BURMESE MANUAL.

PART I.

The Alphabet and Pronunciation.

BURMESE is a tonal language belonging to the Mongolian family like Chinese and Siamese. It is a monosyllabic language, but in the course of time some syllables have lost their meaning and become amalgamated with others. With the spread of Buddhism into Burma, Pali became the religious language of the people and many words of more than one syllable were introduced into the language. (i) The alphabet is derived from the square Pali and consists of 42 letters of which 32 are consonants and 10 vowels.

(ii) The vowels are:

Initial	FORM.	Symbol or form of vowel when combined with		
Generally in Pali words.	In Burmese words.	consonants to form words.	value,	
I	2	3	4	
35	အ	non∽	a	
အာ	အာ	or]*	ā	
83	38	0	i	
ල න	3ට්	⊖	ĩ	
2 or 8	အု	l	u	
දි	39 C	n	ū	
C	C	C	е	
उं	क्र		è:	
ිකු or කො	အော	G-0	aw	
ဪ	အော်	c− ⊃ c− S	aw	
အံ	အံ	•	an	
32	33	0	О	
ဆို	³ ဒို အုံ	i	on	

Note.—] is used instead of D with the consonants DII OII OII OII and OII as the use of D with these letters would lead to confusion by making them resemble other letters, thus CO wa might be mistaken for CO 12

The vowels are only used in the form given in column 1 (except 32 a, 32) ā and 32 ê:) when the vowel itself forms a word or is placed at the beginning of words of Pali origin; thus m = 1 soft, m = 1 this, m = 1 u egg, m = 1 relish. They are more generally combined with the vowel 32 as shown in column 2.

Burmese grammarians include 3 an amongst the vowels. It is a nasal letter called in Pali anuthwara and in Burmese co:co:co the:-the:-tin (from co:co:the:-the: 'small' or 'minute' and co tin 'to place on').

The vowels are only written in their original character when they form distinct words or are part of a compound word. When combined with consonants to form words, they are always represented by the symbols given in column 3.

The sound and transliteration of each vowel are as follows:

Vowel.	Symbol.	Pronuncia- tion.*	Example,	Represented in transliteration by
	none {	a in rural	ജo=asa	а
39	Tione ?	a in amiss	⊌ ma	ă
ജാ	or l	a in far	ana	ā
eg or 38	0	i in pig	8=mee	i
g or ss	⊖	i in machine	8=mee	ī
e or 8 or æ	1 -	o in boot	200=00-	u
g or sq][oo in pooh	్రీ:య=00 100	ū
c or sa	G	ay in say	©=may	е
83	-	nearly as <i>ai</i> in fair	©=pe	è:
ထြ or ထြော or အော	s-o or s-1	aw in law	co}=paw	aw
කෙිර or කෙර	c-S or c-T	aw in drawl	col=paw	aw
အိ	•	an un in dun		an
32	0 }	o in holy	8=ро	О
-1	, ,	o in pot, knot		8
အုံ	· L	on in cone	pyok ຄູ=yon	on

an should be pronounced without letting the tip of the tongue touch the

(iii) Consonants.—When not combined with any other letter every consonant has the sound of the vowel so inherent in it, thus so = ka. so = sa.

The consonants are:

- (1) Gutturals. on kan hkan on ga wo gan nga.
- (2) Palatals. o sa so hsa e za oj za so nya.
- (3) Cerebrals.* ද ta s hta ද da ව da co na.
- (4) Dentals. octa ochta och och och na.
- (5) Labials. O pa o hpa o ba ontba o ma.
- (6) Liquids. w ya qtya w la gla.
- (7) Semi-vowel. 0 wa.
- (8) **Sibilant**. ∞ tha \parallel (sometimes pronounced hard as th in thirst and sometimes soft as th in thee, thine).
- (9) Aspirate. on ha.

In the consonants bracketed together, the aspirated letter has the same sound as the non-aspirate.

* Cerebals and & la are not of frequent occurrence and are only found in words of Pali origin.

+ The tendency of modern Burmese is to substitute ∞ for $\mathfrak G$ whenever possible and $\mathfrak D$ is then pronounced hpa.

‡ This letter is commonly pronounced ya, but in Arakan and in a few words, especially those derived from the Pali, it is pronounced ra.

|| Hard th is transliterated th and soft th is transliterated th.

The student should be careful to pronounce the Burmese unaspirated consonants **k**, **s**, **t**, **p** without any aspiration whatever. This is somewhat difficult as these consonants are aspirated in English*; thus the aspiration is clearly heard in such words as king, cat (and still more in the German kann and somewhat less in sea, tame, pipe. These unaspirated consonants should therefore not be pronounced like English consonants, but like French consonants in such words as comment, savoir, toujours, pouvoir in which no aspiration at all is heard.

The student will have no difficulty in pronouncing the Burmese aspirated consonants as it is only necessary to exaggerate somewhat the aspiration of the same English consonants.

The only other consonant which requires notice is **nga** which is a guttural sound, pronounced without allowing the tongue to touch the palate. At the end of a word, it has the sound **ng** as heard in **hang**.

ကာ ကိ ကို ကူ ကေ ကဲ ကော တော် ကို ကို kū ke kè; kaw kaw kī ku ka ခါ **5** col col ଚ ခေ ລ 3 hki hki hku hku hke hke; hkaw hkaw hkan hko hkā 9 en à en en o 8 8 Q gi gu gū ge gè: gaw gaw gā ga 8 (C) (C) (C) (C) (C) cl C ngi ngi ngu ngu nge ngè: ngaw ngaw ngan ngo ngā 8 60 0 600 601 Q sī su sū sè: saw se saw san sa නි သေ ထဲ သော သော် ဆံ ∞ hsa hsi hsi hsu hsu hse hsè; hsaw hsaw hsan hso

(iv) Compound consonants.—Compound consonants are formed by combining simple consonants with one or more of the four consonants w ya, q ya, 0 wa, and wha, which are then written in a symbolic form.

Consonant.	Symbol.	Combined with	Represented in transliteration by*
ယ ya ၅ ya	J C	<u>ග</u>	kya, gya.

^{*} Gya in this combination is pronounced as the English j; ch is soft as in church. Taw Sein Ko remarks (p. 3): "In the combination \(\Omega\) kya the k should not be pronounced separately from the y, but both should be sounded together, care being taken that the k is not in the least aspirated. This may be accomplished by keeping the teeth together before attempting the pronunciation of the combination. Thus the pronunciation of Kyaukse approximates more to Chaukse than to K(a)yaukse which is generally heard amongst Europeans."

ලි ලිා ලි	kyi kyu al ohu	kyū all chū chū pyū all hpyū	kye cal che cal pye cal hpye cal	kyè: a là ch là là pyè la pyè la	kyaw calo calo chaw calo calo chaw calo calo calo calo calo calo calo calo	kyaw call chaw call call pyaw call call call call call call call ca	kyan o o o o o o o o o o o o o o o o o o o	kyo from Cho pyo of Chipyo

မျှေ မြွေ	2) (g)	୍ଧେ		
hmyue	hmyuè:	shwe	shw	è :

^{*} The correct pronunciation of this combination is hlya, but in the spoken language, it is generally pronounced sha.

(viii) Permutations of final Consonants.—We have seen (§ iii, that every consonant in Burmese has the sound 32 a inherent in it, but many consonants at the end of words do not end with the sound 22 and are then marked by the sign called 'athat' 32000 'that which kills.' Such final consonants change their sound and the vowels and the semi-vowel 0 wa which precede them also change their sound; these changes are called permutations and are shown in the following tables:—

(ix) When the vowel 32 a is combined with the following final consonants the combination is pronounced as follows:—

	က်	ක් 8 8		బ్రస్	ည် တ် or ပ		ယ်
	k	ng	8	ny	t or p	n or m	у
•	et	in	it	1, † e, in or e	at	an	ě
Burmese example.	လက် let	oS win	cô sit	သည် thi ညည် nyin ပြည် pye လည်း lè:	တတ် tat လပ် lat	S: pan:	လယ် 18
Vowel pro- nounced as in Eng- lish word.	met	sin	sin	fee sin say fair	fat	fat	fair

Note.—Final consonants are pronounced in Burmese without any escape of breath*—thus put in Burmese would be pronounced like put in 'put down' and the k in yaik like c in active.

* See Primer of Phonetics by Henry Sweet, M.A. § 143.

† Note.—It is only practise which will tell the student which of the four sounds as has; sometimes a circular dot is placed over as when it has the sound in thus as nyin. The sound is only used in colloquial language

တက် တင် တစ် တည် တတ် တန် ကပ် တပ် တယ် kin kit kī kat kan kat kan ခက် ခင် ခစ် ခည် ခတ် ခန် ခပ် ခမ် ခယ် hket hkin hkit hkī hkat hkan hkat hkan hkè ငက် ငင် ငစ် ငည် ငတ် ငန် ငပ် ငမ် ငယ် ngin ngit ngi ngat ngan ngat ngan ngè စက် စင် စစ် စည် စတ် စန် စပ် စပ် set sin sit sī sat san sat san sè တက် တင် တစ် တည် တတ် တန် တပ် တပ် တယ် tin tit ti tat tan tat tan တျက် တျှင် တျှစ် တျှည် တျှတ် တျှန် တျှဝ် တျှပ် တျှယ် kyet kyin kyit kyi kyat kyan kyat kyan kyè ချက် ချင် ချစ် ချည် ချတ် ချန် ချ**ပ် ချ**ယ် chet chin chit chi chat chan che chan che မြက် မြင် မြစ် မြည် မြတ် မြ\$ မြဝ် မြ**်** myet myin myit myi myat myan myat myan myè ဌက် ၎င် ဌစ် ဌည် ဌတ် ဌန် ၎ပ် ၎ယ် hnget hngin hngit hngi hngat hngan hngat hngan hngè ရှက် ရှင် ရှစ် ရှည် ရှတ် ရှန် ရှဝ် ရှမ် ရှယ် shet shin shit shi shat shan shat shan shè

(x) When the vowel 33 i is combined with the following final consonants the combination is pronounced as follows:

	တ် or δ	\$ or \$ n or m		
	eik	ein		
Burmese example.	Sත් peik c8S leik	38န့် ei¤. လေပို့ lein.		
Vowel pronounced as English word.	vein	÷		

නින් නිරි සින් සිරි නින් සිරි සින් සිරි keik keik seik seik teik teik yeik yeik නිරි සිරි සිරි සිරි නිරි සිරි සිරි kein kein hkein hkein sein sein tein tein pein pein

(xi) When the vowel a u is combined with the following final consonants the combination is pronounced as follows:—

	1	of or S t or p		\$ or ° or \$ n or		
		ok	on			
Burmese example.	-	S yok lok		ထုန် hton ကုပ် kon		
Vowel pronounced as in English word.			bone	e 6		
ကုတ် ကုပ် စုတ် kok kok sok		တုတ် tok	ထုင်		ရ S yok	
တုန် ကွန် စုံ kon kon son	စုပ် son	တုံ ton	တုပ် ton	S Q\$ pon	ပုS pon	
ဟုန် ရုံ တုန် you you lon		ဟုန် hon	ကျိ kyo		hnon	
ကျော ် ကျော ် kyök kyök Note—When pro	chs	k pysk	che	k pysk		

Note.—When preceded by q ya combined with a consonant the vowel o is short as in knot, pot, lot.

(xii) When the diphthong C300 aw is combined with the following final consonants the combination is pronounced as follows:—

		က် k	E ng		
		auk		aung	
Burmese exan	nple	ကောက် ka	ကောင်း kaung		
Vowel pronou in English v	unced as		cow		
ကောက်	စောက်	တောက်	ရောက်	S ကောင်	
kauk	sauk	tauk	yauk	kaung	
	Scoo	တောင်	ပေါ်	}	
	saung	taung	paung	3	
ကြောက်	ခြောက်	ရေျာင်	ကြောင်	် လျှောက်	
kyauk	chauk	chaung kyau			
	ရှေး	ာက် ရှေ	3cg	(shauk)	
	sha	uk sha	ung		

(xiii) When the diphthong 3 o is combined with the following final consonants the combination is pronounced as follows:

as ionows.		
	က်	3
	k	ng
	aik	aing
Burmese example	လိုက် laik	88 kaing
Vowel pronounced as in English word.	lyre	like.
ကိုက် စိုက် ထိုက် kaik saik taik ကျိုက် ပြိုက် ပြို kyaik chaik pyai (xiv) When the so	င် ရှိုင် လှိုင်	ကျောင် ချ င် kyaing chaing
the following final co	nsonants the com	bination is pro-
nounced as follows:		
	of or S t or p	S or S or •
-	ut	un

	of or		S or S or •		
	ut		un		
Burmese example	လွှတ် lut		85 : mun:		
Vowel pronounced as in English word.		bul	1 foot		

(xv) O wa combined with a ya also takes the sound w

(xvi) \mathfrak{S} t and \mathfrak{S} p \mathfrak{S} n and \mathfrak{S} m or n combined with \mathfrak{S} wa are pronounced not at and an, but ut and un.

It is absolutely necessary that the student should learn by heart the vowels, their symbols, the consonants and the compound consonants, he should copy them out until he knows them thoroughly and then practise writing them out without looking at his book.

It is not however necessary for the student to attempt to learn the permutations by heart, it is sufficient if he will remember that the permutations are arranged according to vowels and he can look up the permutation of each word as he comes across it; thus in ∞ han, ∞ lat, ∞ thi, ∞ nè the vowel is α and the permutations will be found in \S (ix); in ∞ seik and \S yeik the vowels is i and the permutations will be found in \S (x).

In the permutations the vowels are changed as follows:—

a = a, i, e, in or e:

u = o or s (when preceded by ya combined with a consonant.)

i = ei.

o = ai

aw = au.

wa = u (before t, p, n, m, or when combined with ya).

The following table of permutations may be found useful for easy reference.

		COMBINED WITH						
Final Consonant.			အ a	ය i	အ ျ	3200	c300 aw	O wa
က် k	***	et				aik	auk	
E ng		in				aing	aung	
δs		it						
pS ny	***	ī, e,	in, è :	3				
ည် ny တော် t or ပြ p		at		eik	ok		2-11	ut
\$ n or S m	***	an		ein	on			un
ယ် y					yok			yu

Vowels. - - on tha-ya

The vowels have no names but their symbols are named as follows:

or] = q cha placed down.

o = လုံးကြီးတင် lon:-gyī:-tin large circle placed on.

= လုံးကြီးတင်ဆန်ခတ် lon:-gyl:-tin-hsanhkat large circle placed upon and kernel put in.

| = တ**ေျ**ာင်းငင် **tă-chaung:-ngin** one line drawn.

| = နှစ်ချောင်းငင် hnā-chaung:-ngin two lines drawn.

c = ∞ co ∞ : tha-we-hto: thrust out.

= ຣຸຈາຕົບစ nauk-pyit thrown backward.

—ോ or — ി = യാറേയ്ലാ tha-we-hto:-cha thrust out and placed down.

— S or — T = യഠേയും എം പ്രേഷം - cha-shehto: thrust out, placed down, and thrust forward.

= conscored the:-the:-tin small or minute (thing) placed on.

ပ = လုံးကြီးတင်တခ်စျင်းငင် lon :-gyī :-tintā-chaung :-ngin large circle placed on and one line drawn. i = သေးသေးတင်တရောင်းငင်း the :-the :tin-tä-chaung:-ngin small or minute (thing) placed on, and one line drawn.

Consonant symbols.

ျာ=လပင့် ya-pin ya lifting up.

=0 wa-hswe: wa suspended.

J=0008: ha-hto: ha thrust out

Conjunct consonants.—In many Pali words two letters of the same class are written one above the other and the top letter is a final consonant, thus ∞ 23, this-sa.

Sometimes double consonants are found in Burmese words. These are not, however, conjunct consonants, but are merely placed over each other to save space in writing. thus 200 = 000: tha-ma: and 200: tha-mi:

The final consonant င်း is occasionally placed over the initial consonant of the next syllable; thus အင်္ကြီး for အင်း ဤ ein:-gyi jacket, သင်္ဘော for သင်းဘော thim:-baw ship The င် used in this way is called တင်းစီး kin:-zi:

Tones. (J. §37-39. L §51). There are three tones in Burmese, the simple, the checked and the heavy. The checked tone is denoted by a small round dot called GODOS auk-myit 'the understop 'and is placed below a letter thus GO me' to forget.' The heavy tone is denoted by two round dots called OODOS SOO: wut-sa-hnā-lon: or GODOS She-pauk they are placed after a letter thus GO: me: 'to ask.'

In the *simple* tone the word is pronounced with a rising inflexion of the voice; in the *checked* tone the voice is suddenly checked or arrested; in the heavy tone the sound is prolonged with a falling inflexion.

Taw Sein Ko (p. 3) advises the foreign student to use the following table to accustom himself to the correct

utterance of the tonal inflections:

kan kan kan:

There are many Burmese words spelt alike and distinguished only by these tones, so that the student should notice them as much as possible, thus:

cost taung - hill, south

cos & stiff.

coos basket, to demand.

60028 htaung-prison, to set a trap, to place upright

cos to Lend.

cost: to pound.

QE myin—to see.

GE high.

SE: pony.

co ye-water.

ດຸະ to write.

mo kyā-water lily, long.

to hear, space between.

O) sa letter.

Oo: to eat.

cook saung—coverlet.

cook to watch, wait for.

cook: harp, to be on one side.

co e-air, wind.

co to practise.

co: bow (n.), four, heavy.

o\$ pan-to ask leave, beg.

os: flower, tired.

c] nga_1

cl: fish, five.

and hpya-mat.

913: tever.

pya—to show.

Q3 ashes, blue.

Qo: flat, level.

C\$ ne -sun, to stay.

ca day.

ငယ္ me—to forget.

cc: to ask.

co we-to divide.

co: far.

200 tha-pleasant.

ODD3 son.

Pronunciation of Burmese.*

Hard consonants are softened when they come in contact with vowels or nasal sounds in the same way as in many other languages, but in Burmese the change only takes place in pronouncing the word and not in writing and the consonant is affected by the letter which precedes it and not by the one that follows it, thus so: kyī: large and coco: hkā-le: child when joined to such words as if they were written sign; and ocos gā-le: but the writing remains the same.

လူကြီး lu-gyi : elder.

လူကလေး lu-ga-le : boy.

ωδ: min-gyí : great ruler.

မင်းကလေး min-ga-le: little ruler.

The rule regarding these phonetic changes may be stated as follows:—

(1) When two words or syllables, the first of which ends in a vowel or nasal sound (ng, ny, n or m) are placed side by side so as to form a new word or convey a single idea, the initial of the second word or syllable, if it is a hard consonant is changed into a soft consonant, thus:

on ka or a hka becomes o ga.

o sa or o becomes @ za.

on ta or on hta becomes 3 d.

O pa or O hpa becomes O ba.

ന്വ kya or ച്ച cha becomes വ്വ gya.

tha (hard) becomes tha (soft).

^{*} These rules are taken from different grammars (see Judson, §§ 33-36 and § 78, Lonsdale §§ 47-50 and § 193, notes (1) and (2); Taw Sein Kopp. 60-62 and 66-67).

Note.—This rule generally applies to single words of more than one syllable in which the etymology of the parts has been lost; thus: ວບໃ: sā-bā: paddy, ວດວະ sā-gā: word but it does not apply to verbal nouns and other nouns beginning with 30 a, thus: 30ດຊາ: a-kyo: advantage, အင်္ကောင်း a-kyaung: fact, အດຊາ: အသန်း a-kū: a-than: trading.

It also applies to auxiliary verbal affixes, 2003 thitha, 288 hso-baing.

It does not apply to synonymous or nearly synonymous verbs, but it often applies in the case of compound verbs, especially when the etymology of the second part has been lost, thus:

Scool po-hsaung to convey.

ရောင်းချ yaung:-cha to sell off.

c> φε ne-htaing to reside.

ကွယ်ကာ kwe-ka to protect.

O pya-tha to show.

ငောဆုံး the-hson: to die.

ပြောဆို pyaw-hso to speak.

ဆုံးဖြတ် hson:-hpyat to decide (case).
in which no phonetic change takes place.

သင်းကျင်း hkin:-gyin: to arrange. ထိုင်တ**်း taing-dan:** to complain. တောင်းပန် taung:-ban to entreat. ၅၁၄၉ sha-bwe to search for.

ဇှန်းဆီး hpan :-zī: to arrest.

in which the phonetic change occurs.

(2) Nouns and pronouns immediately followed by the case affixes of ko so: ā: cook kyaung of twin on hmā or of i (suppressed) are always pronounced with the abrupt tone.

Note.—This rule applies to compound nouns or pronouns in which the first part of the compound is really a genitive with G isuppressed.

ဘုရား ကျွန်တော် (your lordship's royal slave = 1) is pronounced : hpa-ya-kyun-daw.

တရား သူကြီး (headman of the law = Judge) is pronounced ta-ya-tha-gyi:

(3) When the first word or syllable ends in \mathcal{E}_{ng} or \mathbf{p}_{n} or a hard consonant and the second word or syllable begins with $\mathbf{p}_{n} \otimes \mathbf{m}$ or a soft consonant, the \mathbf{p}_{n} of the first word or syllable is assimilated to \mathbf{p}_{n} or the hard consonant changed into \mathbf{p}_{n} .

Somein:-ma woman, is pronounced and often written a meim:-ma

യാട്ടോ thin:-baw ship, is pronounced thim :-baw

ຈຸຣົຊວ nit-na to suffer, is pronounced and often written ຈຸຣົຊວ nin-na

ဒေသက်င်ပုံ auk-me to regret, is pronounced and often written ဒေသင်းငမ္ aung:-me

မြန်မာ myan-mā Burmese, is pronounced and often written မြဋ္ဌာ myā-mā (coll. ဗမာ bā-mā).

ခင်ပြား hkin-byā: Sir or Madam, is pronounced and often written ခင်ဗျား hkim-byā:

မှတ်မီ hmat-mi, to remember, is pronounced and often written မှန်မီ hman-mi

ပုခ်ိမ pod-ma paragraph, section, is pronounced ပုန်မ pon-ma

(4) Many words ending in long 'a' or 'u' often shorten in pronunciation their first and second syllable when another word or syllable is added to form a compound word.

ool: sa-ba: paddy.

oul:നി sā-bā-gyi granary.

OM): sa-ga: word.

စကာသူတဲ့ sa-ga-bon proverb.

တီခါး (pron. တဂါး) ta-ga: gate.

တံခါးနှိ ta-ga-ni red gate.

ပယ**ား mā-yā:** wife.

မယားကြီး mā-yā-gyi chief wife.

မယားငယ် ma-ya-nge lesser wife.

Cl: ngā: fish.

cl:8 nga-pi fish pastel

ငါးငြောက် nga-chauk dried fish.

သူကြီး thū-gyī: or tha-gyī: headman.

ြူသူတြီး myo-tha-gyi: town headman.

လှေသူကြီး hle-tha-gyi: boat owner.

တရားသူကြီး tā-ya-thā-gyī : Judge.

Note.—On the analogy of this rule when more than two words are joined together in pronunciation, the accent is thrown on the last syllable and the long vowels of the other words or syllables are shortened.

တ္ခုႏိုင္သာနီ ေတာ္ခ်ဳိ မျိုး (of the race of the slaves of your lordship = 1) is pronounced hpa-ya-kyun-daw-myo:

ထောင် ရှစ်ရာကိုး ဆယ် ရောက်ရ 1896, is pronounced. htaung-shit-ya-ko:-zè-chauk-hku.

(5) The 35 or 35 an of an initial syllable is dropped.

ουδ hsa-bin hair.

တိခါး ta-ga : door.

ပန်းကန်ပြား pa-gan-bya: plate.

တိုငါ ta-nga fisherman.

တ\$သာ ta-za ornament, tool.

υ\$: 85 pa-dein jeweller.

υ\$: O pa-be: blacksmith.

တန်တား ta-da : bridge.

(6) The u or $\bar{\mathbf{u}}$ of the first syllable of a word is often elided.

ဘုရား hpā-yā : lord,

သူကြီး thū-gyī : or thă-gyī : headman.

ဘုရင် bā-yin king.

ီဘုရား mi-bā-yā: queen (consort).

ပုတ္ပိုး pa-hto: pagoda.

യൂറ്റ് tha-ye: soldier.

ang: tha-hte: merchant.

သူခိုး tha-hko: thief.

သူငယ် tha-nge, child.

ပုဆိုး pa-hso : waist cloth.

(7) Many words are softened in pronunciation by the insertion of y.

υδ pyit to throw (generally written [98)

ωρδ myi to name.

ωρδ myi future affix.

ပဋည်း pyis-si : property.

တပည့် ta-byi (coll. ta-be) pupil, disciple.

of i tense affix becomes a ye in colloquial.

(8) Initial consonants are aspirated.

8 hmī to reach (often written 8).

နှတ် hnok to draw (often written နှတ်).

& hnaing to be able (often written & δ).

ω & hmin ink (often written 98).

အလွန် a-hlun very (often written အသွန်).

നാരോ: hkā-le: child (often written മസോ: in L.B.)

- (9) When the relative pronoun is suppressed, the verb of the relative clause is softened if preceded by a vowel or a nasal, thus:
 - အဆို ပါတရား ခံ a-hso-ba-ta-ya-hkan the defendant mentioned in the plaint.
 - အဘိုး ငါး ရာတန်အပ် a-hpo:-nga:-ya-dan-ein a house worth Rs. 500.
 - အသူ တော်ခံ လျှောက်လွှာ a-yu-daw-gan shaukhlwā a petition of appeal.
 - ရိုး ရာပါပ_{စ္ပ}ည်း hko:-ya-ba-pyis-si: stolen property
 - ထား ပြတိုက်ရာပါ ပ_{ပြ}ည်း dă-mya-taik-ya-bapyls-si: dacoited property.
- (10) When the same word is used as a verb and a noun, there is generally a difference in pronunciation.

ορεη: ωρδ sā-ye:-thị to write a letter.

ODGQ: sa-ye : clerk.

အမျှတင်းတည် **a-hmu-htan:**-thī to serve Government (military).

သမှတ**်: a-hmu-dan :** soldier, constable.

မြင်း ထိန်း သည် myin:-htein:-thī to look after a horse.

Sc: ωS: myin-dein: groom, syce.

ငြေတြင်းသည် mye-taing:-thi to measure land.

မြေတိုင်း mye-daing: a surveyor.

(11) In many words derived from Pali, letters used in the original spelling are retained although they are not pronounced in Burmese, thus we find many silent consonants at the end of these words and many silent vowels in the body of these words:

3088 a-deib-be meaning, from a-dip-pa-yo.

သာညှဲရာယ် an-da-ye evil, from an-ta-ra-ya.

အပါတီ a-pe state of punishment, from a-pa-ya.

ဥပါတ် u-pe stratagem, from u-pa-ya.

2008 u-bok performance of duties of religion, from u-paw-thă-hta.

ဥယျည်၌ မ-yin garden, from u-yā-na.

ന്റാ് ku-tho religious merit, from ku-tha-la-

oβos ko body, from ka-ya.

ပစ္စညာညီ pa-dein-nyin assent, engagement, from pahti-nya-nan-

8c5 hpo profit, reward, from hpa-la.

808 bo military officer, from ba-la.

ဘက္ကာ pa-da treasure.

ိုယ်း mo: sky, rain, from me-hga.

& mo (mount) Meru, from me-ru.

യ്യൂള് thi-ho Ceylon, from thi-hala.

သင့္ပြဲဟ် thin:-gyo to perform funeral rites, from thin-ga-ya.

Punctuation (L. §411-414).

The stops used in Burmese punctuation are 1, 11 and

The first mark | called \Socos paik-hka-le: is now seldom used, | being substituted for it.

The second mark ψ is used when we would use a comma, a semi-colon or a full stop.

The third mark | | | is used to divide paragraphs.

သခုဘိုဘ် ့ သင်းဘော thim :-baw

သွေဒီ " သွေးဆောက် thwe:-thauk

O over a number means 'rupee' and is probably an abbreviation of $\mathbb{C}_{\mathbb{C}}$ money; O over the number = 'anna' and is an abbreviation of O auna; E over a number = pie and is an abbreviation of $\mathbb{C}_{\mathbb{C}}$ would mean Rupees four, annas five, pies three.

^{*} In modern Burmese this abbreviation is also employed after other vowels—thus and yet day is often written at the a is then often suppressed with numbers and alone remains—thus a is written for same the fifth day.

PART II.

In these grammatical notes and the exercises which follow, an attempt has been made to deal separately with Burmese as it is written and spoken by educated people in modern days, excluding the more complicated and often obsolete literary forms as well as the slip-shod and elliptical forms of the colloquial which may be described as slang.

The examples given in the exercises have been taken chiefly from Burmese Petitions,* so that the students may have the opportunity of using the sentences separately and then as a connected text.

THE PARTS OF SPEECH.

Articles.

There is no definite article in Burmese and the indefinite article is sometimes expressed by the use of 'one' and a numeral affix.

Nouns.

Collective nouns are generally formed by using several words together.

kyue:-nwa: (buffaloes + bullocks) cattle. sit-thi-bo-ba (soldiers accompanied by officers) army.

Collective nouns are also formed by using a general and a particular word together:

ko-let (body + hand) body.
a-wut-pa-hso: (clothes + waist-cloth) clothes.
hnit-la (years + months) many years.
la-yet (months + days) many days.

^{*} Burmese Petitions by J. W. BRIDGES, University Press, Oxford, 1907.

Proper Nouns.

There are no family names in Burmese and words generally indicating relationship are prefixed to names which usually have a meaning, such as hpyū white, nī red, Maung (Mr.) Hpyū, Ma (Miss or Mrs.) Nī.

The words used before proper names often indicate the relative rank of the speaker and the person spoken to or the estimation in which the person is held. The words prefixed to the names of men are:

Ngã indicating inferiority, Ngã Hpyū.

Maung (brother) indicating equality, Maung Hpyū.

Ko (ã-ko elder brother) indicating superiority, Ko
Hpyū.

U: (uncle) indicating superiority or age, U: Hpyū.

In Upper Burma petitioners and suitors always spoke of themselves as nga and were so addressed by Upper Burma officials. In English times this distinction is seldom observed and nga is seldom seen or heard in our courts.

The words prefixed to the names of women are:

Mi (a-mi daughter) indicating inferiority, Mi Nī.

Ma (ā-ma elder sister) indicating equality, Ma Nī.

Mo (a-mo mother) indicating superiority, Me Nī.

A-yī: or daw or a-dāw (aunt) indicating superiority or age, A-yī Nī or Daw Nī

shwe golden, royal, is often placed before a name to indicate respect or the estimation in which the speaker is held.

Names of countries, towns, villages, rivers, etc., are never used (except colloquially) without the word country, town, village, river, etc., being placed after them. The

capital of a country has the word myo-daw, royal town, placed after it. Mandalay was always spoken of as the golden royal town. The principal town of a township (country) has the word myo-ma (chief town) placed after it.

Adjectival or Verbal Nouns.

[L §70] Verbal nouns are formed from verbs or adjectives by pre-fixing a or adding chin*: or chet, a-kaung: or kaung:-gyin: goodness, a-hson: or hson:-gyin: extremity, a-pyaw or pyaw-gyet speech.

chet comes from a-chet 'subject, matter,' and is generally used to form nouns from verbs meaning, 'to speak, think,' etc.

Gender.

(L §82.] §55-56.) There is no grammatical gender in Burmese, the natural distinctions of the sexes alone makes the gender of nouns as in English. ma is the sign of the feminine gender.

In the case of rational beings different words may be used to express the masculine and feminine genders or the affix ma may be joined to the masculine form to denote the feminine gender.

Masculine.

a-hpe father
maung brother
ba-yin king
lin husband
min-tha: prince
tha-hte: merchant
a-ko elder brother

Feminine.

a-mo mother
hnä-ma sister
mi-bä-yā; queen (consort)
mä-yā; wife
min-thä-mī; princess
thä-hte:-ma merchant's wife
ä-ma eld:r sister

^{*} c'in comes from a-chin : 'act : or ' deed.'

Masculine.

Feminine.

nyī younger brother (of nyī-ma younger] sister (of men)

hpā-htwe: uncle, father's wounger brother or stepfather

sister

w:-yi: uncle, mother's bro gyi:-daw aunt, mother's sister (elder)

Sometimes the words that and thu are used to denote the two genders. (L $\S 85$.)

a-nya-thā: a man, native a-nya-thū a woman, naa-htet-thā: a man, native a-nya-thū a woman, na-Burma. Burma.

auk-thā: a man, native of Lower Burma
ein-thā male member of a
ein-thū female member of a

household household

yua-tha villager (woman)

When the inhabitants of a country, town, etc., or the inmates of a house are spoken of generally, the masculine and feminine nouns are used together.

pye- $th\bar{u}$ **pye-** $th\bar{n}$ the people of the country. **myo-** $th\bar{u}$ **myo-** $th\bar{u}$ the townspeople. **ein-** $th\bar{u}$ **ein-** $th\bar{a}$ the inmates of the house.

When birds are spoken of **hpa** or **hpo** is generally used to express the masculine.

kyet-hpa cock. ngan:-bo gander, ngan:-ma goose.

For animals htī; is used for the masculine.

hkwe:-dī: dog.

wet-htī: boar.

nwā:-dī: bull, ox.

hkwe:-ma bitch.

wet-ma sow.

nā-ma cow.

Number.

(L §73-81. J §54.) Nouns form their plural by adding myā: or to the singular. myā: is an adjective meaning 'many' and is generally used in connection with inanimate things and to in connection with persons or animate things, but this rule is not strictly adhered to.

Plurality in the sense of universality is expressed by the reduplication of the noun and prefixing a to the reduplicated form apperbye countries, amyomyo all towns. When the noun consists of two words or syllables either of them may be reduplicated, anaint-ngan-naing-ngan or a-naing-naing-ngan all kingdoms (T. S. K. p. 64. J §51). Some grammarians consider these forms as adverbial [L. § 451 (viii) J. §126 (5)].

Word order.—The plural affix is placed immediately after the noun lu-do-thi, the men, yua-mya:-hma, in the villages.

Declension.

(L §87-98. J §59-71.) There is no true declension in Burmese, as nouns are not inflected, and the so-called cases are formed by adding to the nouns certain particles, many of which have now lost their separate meaning.

The chief case particles are:

Nom, thit or hma or ka, lu-thi or lu-hma or lu-ga, man

Gen. i lu-i or lu, man's.

Dat. ko, lu-go, to man.

Acc. ko, lu-go, man.

Nominative. thi is the true nominative particle.

^{*} In short simple sentences and in clauses where the noun is placed close to its verb, the nominative affix thi may be omitted [L §91 (ii)].

hma is emphatic and generally has the meaning of 'as to,' 'as for,' 'concerning,' 'in regard to,' or is used to call attention to that about which one is going to speak and then means 'as follows.' It is also the affix used in noun clauses.

ka is chiefly used, with verbs of saying, telling, thinking, considering, etc., but is often used instead of thi.

Genitive.—The genitive always precedes the noun to which it refers like the English possessive in 's.

The particle i is generally omitted and the noun or pronoun standing in the genitive is pronounced with the checked tone or if it ends in \bar{a} or \bar{u} , the vowel may be shortened thu-hkwe: his dog, nga-a-hpe my father.

Pative.—The accusative particle ko is used also for the dative and the ko belonging to the noun in the accusative is then left unexpressed, hka-le-go ye-pe:-ba please give (some) water to the child.

Accusative.—The accusative particle ko is often used instead of tho to indicate motion towards a place.

Word order.—The case particle always follows the word to which it refers.

Personal pronouns.

(L. §181-189, T. S. K. pp. 68-70, J. §77-78.) -The personal pronouns of the first and second persons are

(a) when addressing equals in rank.

Ist person.

(1) kyun-nok (m) kyu-ma (f) kyun slave, nok small, used also in speaking in a familiar manner of one self. and person.

(1) thin (m. and f.) is used in the literary language without any reference to relative rank. When used collequially, it denotes some inferiority.

1st person.

In modern Burmese kyun-nok is often written kyā-nok to avoid the use of the word kyun, (slave) and thus disguise the humiliating derivation of this pronoun. In colloquial kyunnok is often contracted to kyok.

and person.

(2) kwe (plural kwe-yo) is used in the vocative only in colloquial, it is placed at the end of the sentence and corresponds to the English 'old fellow' mathl-bu:-la:-gwe don't you know, old fellow.

(3) ko (body) is used chiefly

in colloquial.

(4) shin (pron. yin) novice
with maung (brother)
or ko (elder brother)
is used by women to
men younger or older
than themselves. Ko
yin is used colloquially
by men without reference
to age.

(5) shin, lord, master, is used by women as a polite form of address to men or women; shin-ma is used by husbands to wives; taw is used in the same way, but is considered rather impolite.

(6) hkim-bya: (cerruption of tha-hkin-hpa-ya: lord and master) is used by men as a polite form of address to men or

women.

(b) when addressing inferiors in rank.

1st person.

(1) ngā (m. and f.) also used when speaking to oneself, also when speaking to children or in anger to equals. and person.

(1) **nin** (m. and f.) used to persons considered very inferior or to children, also to equals in anger.

(2) min: or maung-min:
(m.) (brother.) nyi:
or nyè or me-min:
are the feminine
forme of min: and

maung min:

(3) tā-gā is used by a pongyi when addressing a layman, tā-gā-ma is the feminine of tā-gā.

(c) when addressing superiors in rank

(1) a-kyun-nok (m. and f.) (2) kyun-daw (m.) royal slave, kyun-daw-ma,

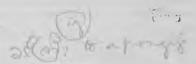

kyu-ma (f.)

(3) kyun-daw-myo: (m.) of the family of the royal slaves, kyundaw-myo-ma (f.)

hpā-yā: (Your Majesty, my lord, sir) may be prefixed to hpā-yakyun-daw hpā-yakyun-daw-myo:

ta-byi-daw royal disciple (m.) is used by a layman addressing a pongyi, ta-byi-dawma is the feminine. Burmans do not make use of the pronoun of the second person in addressing persons of superior rank.

ko-daw (royal self) ko-daw-myat (eminent royal self) ko-daw-a-shin (lord royal self) ko-daw-a-shin-myat (lord, master) a-shin-myat-hpa-ga: (eminent lord, master) (all m. and f.) are used to members of a royal family, officials of a royal family, officials of high rank, and pongyis.

Personal pronouns of the third person.

thū (probably from 1ū 'person') is only applied to rational beings. There is no pronoun used for animals or inanimate objects, the noun is merely repeated with a demonstrative adjective hto, thī or 1ā-gaung:

thin: and chin: are used in a disrespectful way to mean 'that thing or creature.'

mi-mi is used instead of the genitive thu-i. It has however a more emphatic possessive meaning than thu-i and
means 'one's own,' 'his or her own.' lu-ta-yauk-thi mimi-ein-hma htwet-thwa:-le-i a man went out from his
own house. With this meaning of 'own' it has come to
be used instead of thu to mark emphasis: she-ga mi-mios-sa-go mi-mi-hpwet-yue hta:-gye-thaw, ya-hku mimi-os-sa-go mi-mi-hnyun-pya-byi whereas formerly he
himself hid his own property, he himself has now pointed
out his own property.

General remarks on the use of Personal pronouns.

Personal pronouns in Burmese mark rank so sharply that their use is generally avoided except where the respective position of the parties is clearly defined such as parents and child, master and servant, friends of the same age, etc., so that people addressing others politely generally use nouns in speaking to others in the third person and also use nouns in speaking of themselves in the third person.

If a person has any official position the use of a person's title is obligatory, and Burmese officials dislike being addressed by their name instead of their title. In Burmese times if a man was addressed officially by his name instead of his title, this meant disgrace. It is usual to add to the

title min: meaning 'a ruler,' 'an official,' hence 'noble' as nobility of office was the only nobility in Burma. myo-ok-min: thā-gyi-min: The word min: is often used in addressing politely people who are not really officials; thus lu-gyi-min: in speaking to a village elder, she-ne-min: in speaking to an advocate.

The wife of a man of official or social rank has the word kā-dāw (lady) added to her husband's title:

wun-gyi-kă-daw wife of a minister of state, min-kă-daw wife of any official. thā-gyi-kā-daw wife of a headman. hle-zi-kā-daw wife of a boat owner. pwê-kā-daw wife of a broker.

The use of the pronoun of the second person is generally avoided when addressing persons politely even if inferior in rank; if they have no title, it is usual to find some title with reference to the profession of the person spoken to or to some work of religious merit which he has or is assumed to have performed, such titles would be yua-lu-gyi; (village elder) hle-tha-gyi: (headman of a boat), thim-bawtha-gyi: (headman of a ship), pauk-hpaw (relative, generally used to Chinamen) o-tha-gyi: cook, headman of the pots, used to Shans), kyaung-ta-ga (founder of a monastery), hpa-ya-ta-ga (founder of a pagoda). Terms of relationship are also used according to the age and sex of people in addressing them politely, a-hpo: or hpo-e (grandfather) ahpwa: (grandmother) a-hpo (father) a-mo (mother) a-ko (elder brother) a-ma (elder sister) nyī (younger brother) maung or a-maung (a woman's brother) nyi-ma (younger sister) tha: (son) tha-mi: (daughter) myi: (grandson).

A pongyi speaking to a person of high rank would speak of himself as hsa-ya (teacher) and of the person addressed as ta-ga-daw royal giver (contraction of da-ya-

of which your now

kā, giver) an English official speaking to a pongyi would generally address him as hsā-ya-daw and speak of himself as tā-ga-daw.

Europeans are generally addressed as **thā-hkin**. This word meaning 'lord,' 'master,' is used in the literary Burmese with words of relationship: **hpa-gin**, lord father, **megin** lady mother—it was applied in Upper Burma to the wives and daughters of high officials—**hkin-le-u**: the lady Le U: In Lower Burma it has now become the equivalent of our word Mr.

Reflexive pronouns.

(L. §195. J.§77.) The reflexive pronoun is formed by affixing ko 'body, 'self' to pronouns or nouns, and taing is usually added to ko—ngā-ko-daing lok-thī I myself did it.

The pronoun mi-mi is used reflexively with kc—thu mi-mi-ko-go a-lun-myat-thi-hu htin-i that person considers himself very excellent.

Reciprocal pronouns.

(L. §200.) a-chin-gyin: is the reduplicated form of a-chin: (fellow) and is equivalent to 'each other,' 'one another,' thū-do a-chin-gyin: yaik-kya-thī they struck each other, one another.

(L. §121.) A reciprocal pronoun can also be formed by combining ta with a numeral affix and reduplicating this combination. thū-do-thī tā-yauk-ko-tā-yauk mon:-gya-thī they hate each other, one another.

Plural pronouns.

The personal pronouns are declined like nouns, they make their plural exclusively with to

Interrogative Pronouns and Adverbs.

(L. §137-142. J. §82 83 and 87-88). The interrogative pronouns are formed from the adjectives **myi-thi** and **be**, which mean 'what,' 'which,' by adding some noun to them either expressed or understood.

The words formed with myi-thi are exclusively written forms, generally used in business and official documents. The words formed with be are only used in conversation.

	Modern language.	Spoken language.
(1) What? Which? (ad-	myi-thi	bè
jective). (2) What thing? What?	myi-thi (a-ya)-go	bā
(3) Towards what	myi-thi (ne-ya)-	bô
place? Whither? (4) On account of what reason?	myi-thi (a-ky- aung)-gyaung	bè-(a-kyaung)- gyaung
(5) In what place? Where?	myi-thi (no-ya) hmā or dwin	bè (ne-ya)-hmā
(6) From what place? Whence?	myi-thi (ne-ya) hma or ga	be-ga
(7) What person? Who?	myi-t/\(\bar{u}\) *	be-thū
(8) At what time?	myi-thi-a-hka	be-daw-ga
When? (9) How much?	myi-hmya*	be-lauk
(10) How many?	be-hna (with nume- ral affix)	be-hna (with nu meral affix)
(11) Towards what manner? How?	myi- th i-ni: or myi- th o or myi-ge- th o	bè-nè or bè-lo
(12) What kind of?	myi-thi myo :	bè myo:

^{*} When hmya or thu is used with myi-thi the thi is suppressed and the forms become myi-hmya and myi-thu.

In questions relating to quantity in mass or number, definite or indefinite, myi-thī or he is combined with hmya and used directly after the noun it qualifies. In speaking be-lauk is used instead of be-hmya.

hmya is an adverb with the meanings 'much,' 'as much as,' 'so much as,' 'as many as,' 'even.'

In questions relating solely to a definite number behna is placed after the noun it qualifies and the numeral affix of the noun added to it (the word hna is not the cardinal number, it is merely a prefix to the numeral affix.)

lū be-hnā-yauk-le (lit. men what many) how many men myi-thī cannot be used in this manner.

Word order - The interrogative pronoun or adverb is placed immediately before the verb.

Indefinite Pronouns and Adverbs.

[L. § 146-150 and 228-235. J § 82 and 126 (8).] The interrogative pronouns and adverbs are also used as indefinite pronouns and adverbs—and the adverb hmya (corrupted to hma in colloquial and sometimes in the written language) is usually added to them or the verb mā-hso (yuo) which means 'not saying.' be ... mā-hso, signifies 'not saying whatever (person, animal, or thing) in particular,' anything whatsoever.'

The forms ending in hmya or hma can only be used in negative sentences, whereas the forms ending in mā-hso, can be used in affirmative and negative sentences.

Modern language.	Spoken language.	In negative sen- tences.	In affirmative sentences.
myi-thi-hmya	bā-hm a	nothing what-	
myi-thi-mā- hso	bè-mă-hso	at all	anything what-
myi-thi-go- hmya	bê-hma	nowhere (with motion)	
myi-thi-go- ma-hso	be-go-mā- hsō	anywhere wherever (w	
myi-thi-a- kyaung- gyaung-hmya	bè-gy sung- hma	for no reason whatever	
myi-thi-a- kyaung- gyaung-ma- hso	be-gyaung- ma-hso		for any reason whatever
myi-thi-hmā- hmya	be-hmā	nowhere (with-	
myi-thi-hmā- mă-hso	be-hmā-mā- hso) out motion)	anywhere or wherever (with- out motion)
myi- th $ar{ exttt{u}}$ -hmya	be- $thar{ extsf{v}}$ -hma) no one what-	
myi- $thar{v}$ -mã- hso	be-thū-mã· hso	ever, no one	any one what- ever or whoever
&c.	& z.		

The indefinite adjectives ta-zon-ta-ya or ta-zon-ta-yauk, may be used in addition to the forms myi-thi-hmya, and myi-thi ... ma-hso, to intensify the indefinite meaning.

Word order—The adverb hmya is always placed immediately after the case affix.

Relative pronouns.

[L §368-369 and 377 (4) J. §114-125 (2)]. The relative pronouns are expressed in Burmese by—

(a) the tense affixes thi* (often changed to thaw) cr myi (both pronounced with the checked tone).

ngo-thi-(or thaw) hkā-le: the child who cries, yauk-myi mi-thim-baw the steamer that will arrive.

(b) yā which is used in the same way as thaw but often carries with it an idea of indefiniteness.

thin-ya a-mein-go pe:-ba please give any order that may be suitable.

(c) thi (shortened to tha) followed by the adverb hmya (hmya meaning 'as much as,' 'as many as.' 'even') and tha-hmya corresponds to 'whatever' in English.

shi-thā-hmya-myin:-myā:-the-thī (the horses as many as were there died) whatever ponies were there, died.

The relative pronoun is very often suppressed in Burmese especially when there is more than one relative clause:

kyun-daw-myo:-baing Than-lyin-taik-shi le-myā: the paddy fields (which) I own (and which) are situated in the Syriam circle.

a-htot-thă-din-za-htok-w?-yā-bā Man-dā-le:-myone Ma-Cho-hso-thū-meim:-ma a woman called Ma Cho who lives in Mandalay and was mentioned in the last issue of our paper.

^{*} The student should remember that this or thaw corresponds to any case of the relative in English and means not only who or which, but to whom or which, in whom or which, etc., thu nethaw-ein, the house in which he lives, kya-nok pe:-thaw sa-ok the book which I gave.

hko-ya-ba-pyis-si (lit, the property included in the theft) the stolen property.

shauk-win-ba-pyis-si: the property mentioned in the petition.

sā-bā: htaung-thon-ya-bā hle-tā-zin: a boat in which thirteen hundred baskets were contained. Sometimes the relative clause is placed after the noun by using thu.

kyun-daw-myo-a-mī a-thet-ngā:-zê-yuê-thū my mother who is aged 50 (a person who is aged 50).

Word order—The relative clause always precedes the noun which is its antecedent in English. ze-hmā hsan-hko:-thaw lū-thī kyun-daw-myo-thā: hpyit-pā thī the man who stols rice in the bazaar is my son. It will be noticed that the words of the relative clause are in exactly the opposite order to the words in English and that the Burmese order is bazaar in rice stole who (the) man.

Relative clauses ending in thä-hmya may be used before or after their antecedents in English-shi-thä-hmyamyin: or myin:-shi-thä-hmya, whatever ponies were there.

Adjectives.

Adjectives have three different forms-

(a) simple or compound adjectives like she long, myin high, me: black, net dark.

kyi:-myin great, eminent, me:-net, dark, black.
a-hpo-dan, valuable.

- (b) reduplicated adjectives which are really adverbs—such as me:-me: dark, hpyū-byū white.
- (c) substantival adjectives with a prefixed such as a-hpyū white, a-me; black.

(L. §105. J. §80.) Adjectives of quality, quantity and pronominal adjectives are connected with the noun they qualify by means of the connective particle **thaw** or **thi** as **kaung:**-thaw-lū (a) good man, **hla**-thaw-pan: a pretty flower.

Simple adjectives of this class may also be post-fixed to a noun, no connective is then required and the two form a kind of compound noun as lu-gaung: good man.

The connective particle **thaw** or **thi** is really the relative pronoun and the adjective is used as a verb **kaung:**-thaw-lū is therefore the man who is good.

In diminutive nouns formed with hkā-le: the adjective is placed between the two nouns—thus lu-zo-gā-le: a naughty little boy, myin-byu-gā-le: a small white pony.

Comparative.

(L §158-169 J. §94) The comparative is not formed in Burmese by changing the form of the adjective, but by placing the preposition **htet** after the noun or pronoun which forms the standard of comparison, $th\bar{\mathbf{l}}$ -pan: ho-pan:-det hla- $th\bar{\mathbf{l}}$ (lit. this flower, that flower above, is beautiful) this flower is more beautiful than that one.

htet comes from a-htet 'upper or superior part' and
means 'above' or 'beyond'

Verbs meaning 'to surpass, to exceed' with or without the conjunction yue* (which gives the verb the force of a participle) may be used in addition to htet. Such verbs are:—

^{*} In colloquial yue is generally omitted.

tha to surpass exceed to: to increase, advance. Iun to surpass, go beyond po to exceed.

thī-pan ho-pan:-det thā- (or thā-yue) hla-thī (lit. this flower above that flower is surpassing beautiful). This flower is much more beautiful than that one.

Superlative.

(L. §170 J. §95)—The superlative is formed by turning the adjective into a verbal noun and then combining it with **a-hson**: 'extremity, termination' (from **hson**: 'to come to an end') thī-lū a-kaung:-zon:-hpyit*-thī this man is the best (lit. is at the extremity or utmost point of goodness).

The full expression is **a-kaung:-i- a-hson-hmā**, and in forming a compound noun **i** and the initial **a** of **a-hson**: are suppressed as well as the preposition **hmā**.

The broad practical rule is that: the superlative is formed by placing the adjective between the a and hson: of a-hson:

Demonstrative Adjectives.

(L. §127. J. §82). $th\bar{i}$, this or these, **hto** (ho) that or those.

la-gaung: is the abbreviation of li:-gaung: 'and, also.' It means 'the same' or 'that same,' la-gaung-lu-do-thī 'the,' 'those' 'or these men.'

Word order.—The demonstrative adjective is placed immediately before its noun, $th\bar{\textbf{i}}$ - $l\bar{\textbf{u}}$ this man, hto-hkwe: that dog.

^{*} As the superlative in Burmese is really a noun it cannot be turned into a verb by the addition of a tense affix and the verb hpyit must always be used with the superlative.

Possessive Adjectives.

There are no possessive adjectives in Burmese and their place is taken by personal pronouns in the genitive—my book, kyun-nok-i-sā-ok; his pony, thu-myin:

Indefinite Adjectives.

(L. §122. J. §84-85-86). a-lon:* [or a:-lon:] 'all, whole,' and a-lon:-zon 'all' are prefixed or affixed to the noun, myin:-a-lon:-do 'all the hors-s.'

apaung: 'all' is really a noun signifying 'whole sum or amount.' Used as an adjective, it is always affixed to the noun it qualifies. hka:-le-apaung:-do'all the boys,' the total number of boys.'

ta-cha: 'other' is prefixed to nouns, ta-cha: pye-mya:hma, 'in other countries.'

'Other' is also expressed in Burmese by:

- (a) thu the pronoun of the third person, thu-os-sago ma-hko:-hnin do not steal the property of others;
- (b) tit (shortened to ta) with a numeral affix: yua-ta-hku-tho to another village, tha:-ta-yauk ya-aung pyu-daw act so as to get another son.

*The Adjective a-lon: is also used to express the whole.' It is then follows a numeral affix preceded by tā and drops its a, tā-hnit-lon: the whole year, tā-ne-lon: the whole day, thimbaw-tā-zin-lon: the whole, the entire ship, nwa-tā-gaung-lon: the whole bullock.

When a-lon: is affixed to a plural noun, it also drops its a or changes it to sa and signifies 'all the number' denoted by the numeral attached to the noun, hna-ein-lon: (or hna-ein-za-lon:) both houses, thon-ein-lon: all the three houses.

on the headown

tă-cho 'some *' is prefixed to nouns or affixed, tă-cho hkă-le :-do $th\bar{\imath}$ or hkă-le : tă-cho-do- $th\bar{\imath}$ 'some children.'

ni: 'few,' 'not many,' 'little' is seldom used in that form except as a verb; it is more usually found in the adverbial or substantival forms. ni:-ni: [ne-ne] a-ni: or

a-ni :-ngò.

myā: 'many' is used as the plural affix of nouns and is therefore not used in this form to mean 'many' except as a verb. It is usually found in the forms a-myā:, myā-zwā, myā:-myā: to express 'many'—thus lū myā: men, lū-a-myā: many men.

a-myauk-a-myā: 'many, a large number' and myābyā: 'abundant' are often used instead of myā:

(23) Distributive Adjectives.

(L. §124). taing: every; iu-daing:, every person, ne-daing: every day, hnit-taing: every year.

a-thī: a-thī: or athī:-thī: several (when attached to a verb a-thī:-thī: is an adverb and means 'severally.)'

Indefinite Adjectives.

(L. §123. J. §101). tā-hku-gu, tā-yauk-yauk, tā-gaung-gaung 'any one,' 'some out of several.'

tā-hku-tā-le, ta-yauk-tā-le, tā-gaung-tā-le, 'few,' here and there one.'

tă-zon-tă-yā, tă-zon-tă-auk tă-ū:-tă-yauk, tă-zontă-hku, 'some one.'

These adjectives are used in the same manner as numeral affixes (see p. 24) thus those ending in yauk apply to rational beings, those ending in kaung to animals, etc.

Word order.—These indefinite adjectives are placed after the noun without any connective.

^{*&#}x27;Some,' when used as a partitive adjective, need not be translated or is translated by ne-ne; hta-min: (or ne-ne) pe:-ba give (me) some rice. Some others' is expressed by repeating ta-cho

Cardinal Numbers.

tit	one	(shortened to the both in writing and pronunciation when followed by a numeral affix or another number).
hnit	two	(shortened to hna in pro- nunciation but not in writing when followed by a numeral affix or another number).
thon:	three.	•
le:	four.	
ngā;	five.	
chauk	six.	
		(a) automod to bleum burg
hkun-hnit	seven	(shortened to hkun-hnā, in same way as hnit two).
shit	eight.	
ko:	nine.	
ta-hse*	ten	(generally shortened to
		hse when followed by a numeral affix or another number).
hse-tit	eleven.	,
hse-hnit	twelve.	
hnä-hsè	twenty.	
thon:-ze	thirty.	
le :-ze	forty.	apiled.
ngā :-ze	fifty.	to difficulty
chauk-hse	sixty.	
hkun-hna-hs		
shit-hse	eighty.	
ko:-ze:	ninety.	

^{*}kyeik, ten, is often used instead of hse in numbering rational beings, lū tā-gyeik ten men, lū thon:-gyeik thirty men.

tā-yā one hundred, hnā-yā two hundred, tā-htaung one thousand, tā-thaung; ten thousand.

ta-thein: one hundred thousand (one lakh).

ta-than: one million.

ta-ka-de ten million (one crore).

a-seik, a quarter (of 100), is often used in colloquial instead of 25.

tā-beit-thā (one viss), hnā-peit-thā (two viss) are often used in colloquial instead of 100 or 200 when speaking of rupees, as the rupee weighs one tical and there are 100 ticals in a viss (3 65 lb.).

Ordinals.

(L. § 108. J. § 102). The ordinal numbers are formed by adding myauk to the cardinals followed by their numeral affixes, thus thā: hnā-yauk-myauk, or hnā-yauk-myauk thaw thā: the second son. Pali ordinals are however generally used instead of Burmese ordinals from one to ten and they are prefixed to nouns without any connective particle, pā-htā-ma-ne the first day, pyin-sā-ma hsā-yā the fifth teacher.

pa-hta-ma first. du-ti-ya second. third. ta-ti-va sa-dot-ta fourth. pyin-sa-ma fifth hsa-hta-ma sixth tha-ta-ma seventh a-hta-ma eight. na-wa-ma ninth da-tha-ma tenth.

anton

Fractions.

The words used to express fractions are: -

a-wet, hta-wet or ta-wet, half, a-seik quarter.

a-paing:

a-pon share, portion.

a-su

thus ta-wet half.

thon:-zeik three-quarters.

hnä-pon tä-bon half.

hna-paing: ta-baing: half.

thon:-zu hna-su two-thirds.

le:-bon-thon:-bon three quarters.

Weights. Money. = 15th of a tical I anna. one pe 2 annas. two pe = I mv: four pe = I mat 4 annas. = 1 kyat (tical or tola) four mat I rupee. = 1 peit-tha* (viss=3.65 lb.) 100 rupees. 100 kyat

Measures of Length.

a-thit a finger's breadth.

8 thit = I maik.

12 thit = 1 twa.

2 twa = I taung (cubit).

4 taung = 1 lan.

7 taung = 1 ta. 1000 ta = 1 taing (about 2 miles).

Measures of Capacity.

sa-ie = $\frac{1}{5}$ th of a tin: (bushel).

4 sa-le = pyi

4 pyi = 1 seik.

2 selk = I hkwè.

2 hkwe = 1 tin: (bushel).

^{*} With multiples of ten hkwet is used instead of pelt-tha.

Numeral Affixes.

(L. §109-111. J. §96-98). When numerals are attached to nouns, certain words called 'numeral affixes' are attached to the numerals and are used to describe some quality of the noun mentioned, thus 'five men' is expressed in Burmese by 'men five rational beings'—'two eggs' by 'eggs two round things'—'two boats' by 'boats two long things.'

Some of the 'numeral affixes' in most common use are:

yauk u: head in speaking of human beings.

thā-hte: tā-ū: a rich man. yauk-kyā: hnā-yauk two men. meim-ma ngā:-yauk five women.

pā: in speaking of pon-gyis and persons of high social or official rank, also of immaterial objects.

yā-han thon:-bā: three pon-gyis, min: tā-bā: a ruler, min-gyin tā-yā: hsē-bā: the ten rules observed by rulers.

hsū: of Buddhas, pagodas, images and pā-yā-baiks (native books).

hpā-yā: le:-zū four Buddhas, pagodas, or images.

pa-ya-baik hna-hsu two pa-ya-baiks.

hku inanimate objects which have no distinguishing quality.

sa-bwe ta-hku a table. ka-la-htaing thon:-gu three chairs. sī: to ride, of vehicles and riding animals.

yā-htā: hnā-sī: two carriages. myin: tā-zī: one pony. hsin thon:-zī: three elephants. hiò le:-zī: four carts.

hkun: from a-hkun: sound, voice, of words.
sa-ga: hna-hkun: two words.

yat, item, of words, customs.

sa-ga: hna-yat two sayings. hton:-zan ta-yat one custom.

sin: elongated, of things whose length considerably exceeds their breadth.

hle tä-zin: one boat, dā: hnä-sin: two swords, hlan thon:-zin: three spears,

chaung: from a-chaung: a bar, of things straight and stiff.

dok tä-chaung: one stick. hmin-dan le:-gyaung: four penholders.

kaung from a-kaung brute animal, of animals.

myin: chauk-kaung six ponies.
hsin hkun-hnä-kaung seven elephants.
ngā: hnä-kaung two fish.

pya: flat.

palk-hsan tä-byā: a pice. pyln thon-byā: three planks. pä-gan shlt-pyā: eight plates.

chat, flat and thin.

sek-kū tā-chat one sheet of paper. pyin hnā-chat two planks. lon: round or cylindrical.o: ngā:-lon: five pots.u hkun-hnā-lon: seven eggs.

hsaung building.

ein tä-hsaung a house.

kyaung: tä-hsaung a school.

taik thon:-zaung three brick buildings.

saung from a-saung, collection of writings, of writings, letters, books.

sa tā-zaung one letter, sa-ok le:-zaung four books.

kwin: from a-kwin: what is circular, of rings. let-sut ta-gwin: one ring.

pin a tree, applied to any thing long as thread, hair.

on: le:-bin four cocoa-nut trees. hsan ko:-bin nine hairs, chi chauk-pin six threads,

hte from a-hte, cloth.

ein:-gyī hnā-htè two jackets.
pā-wā chauk-htè six handkerchiefs.
thā-gā-lat le:-dè four pieces of flannel,
tweed.

let, hand or arm, of weapons, tools, things carried in the hand.

thin-nat nga:-let five guns. htī: hnā-let two umbrellas.

tan from a-tan, 'intervening space,' 'interval,' of nouns denoting what occurs at intervals of time or space.

a-kyo: le:-dan four rewards. a-tat hse-shit-tan the eighteen sciences. The words used for pairs are:

son from a-son: 'what is complete'
myin: ta-zon: a pair of horses.

shin: from a-shin: pair of beasts of burden.

nwa: ta-shin, a pair of bullocks.

hpet from a-hpet, one of a pair.

hpä-nät tä-hpet one sandal.
let hnä-hpet two hands.
chi tä-hpet one fcot.
kan: tä-hpet one bank (of river).

yan from a-yan, a pair, of things which go in pairs.

nā-daung: tā-yan a pair of ear-rings.

Word order.—(L. §77) Numerals with their numeral affixes follow the nouns they qualify.

The plural affix may be added to nouns with a numeral affix, but it is generally omitted. In hna-yauk-to or In hna-yauk two men.

(L. §114 J. §99) When a noun has no numeral affix of its own, it is repeated after the numeral, myo hna-myo two towns, pye hna-pye to countries.

Sometimes the noun is substituted for its proper affix, ein ngā:-ein for ein ngā:-zaung; min: le:-min: for min: le-bā: four rulers.

(L. §115.) Nouns denoting measures of length, capacity or weight, have no numeral affixes and are repeated after the numeral **pe ngā:-be** five feet, **tin ngā:-din:** five bushels.

The word denoting the measure of length, capacity or weight is however generally omitted in front of the numeral when the thing measured is mentioned.

a-lyā: ngā:-be five foot length. sā-bā: ngā:-din: five bushels (baskets) of paddy. lā-hpet chauk-chin: six baskets (panniers) of green tea.

hsī hnā-peit-thā two viss of oil nā-no tā-beit-thā on e viss of milk.

(L. §116.) Nouns denoting time have also no numeral affixes and the numerals are prefixed to them ngā:-yet five days; hnā-hnit two years, chauk nā-yī six o'clock.

(L. §119) In certain compound nouns, the last element of the compound becomes the numeral affix by the simple insertion of the numeral between the elements, thayet-pin mango tree, thā-yet-ngā:-bin five mango trees; sa-ok book, sā-ko:-ok nine books; kun-yuet betel leaf, kun:-hnā-yuet two betel leaves.

I (L. §112 J. §97.) When the number is an exact multiple of 10 the numeral affix is omitted.

myin: hna-hse twenty ponies. nwa: thon:-ze thirty oxen.

II When the number is exactly to the numeral affix may be used or not.

myin tā-hsè or myin : hsè-gaung ten ponies. u tā-hsè or u hsè-gyat ten eggs.

III With all other numbers the noun is placed first and the number with its numeral affix immediately after it.

hpyā ngā:-gyat five mats.
yā-han: le:-bā: four monks.
dā: hse-hnā-sin: twelve knives.
myln: hnā-hse-ngā:-gaung twenty-five ponies.
nwa: hse-le:-gaung fourteen oxen.

The following words are often used in addition to numeral affixes:

(a) ye* (from a-ye number) preceded by a numeral affix.

lu-ū:-ye hkun-hnā-yauk seven men. lu-ū:-ye tā-hsè ten men. nwā: kaung-ye ngā:-gaung five oxen. nwā: kaung-ye tā-hsè ten oxen.

(b) paung: or a-su-zu-baung: meaning total number.

lu-baung: ngā:-yauk five men.
lu-baung: tā-hsē ten men.
lu-baung: thon:-zē-le:-yauk thirty-four men.
nwa-baung: hkun-hnā-kaung seven oxen.
nwa-baung: hnā-hsē twenty oxen.

(c) chein from a-chein 'weight.'
hsi-gyein ta-hse ten viss of oil.

In the case of measures of weight and dates the numeral affix used varies according as the number is an exact multiple of 10 or an intermediate number.

Dates.—In dates **pyi** (full, complete) is used with 10 or an exact multiple of 10. **hku** (individual thing) with all other numbers.

ta-htaung shit-ya-chauk-hsè-byi-hnit 1860. ta-htaung shit-ya-chauk-hsè-thon;-gu-hnit 1863.

Weight.—In speaking of weight tā-hkwet (from hkwet a cup) and peit-thā (a viss) are used in the same manner.

ngā:-beit-thā = 5 viss, a-hkwet tā-hse or hkwet tā-hse = 10 viss.

^{*} The numeral affix yauk is not used with ye.

Money.

In speaking of money ngwe (silver) or ngwe din:-gā; (coined silver) or kyat-thon-din:-gā; (current coin) are used and the numeral affix is kyat (a tical) or pyā; 'what is flat,'

ngwe nga:-gyat or ngwe nga-bya: five rupees.

ngwe ta-hse ten rupees.

ngwe hna-hse-le-gyat twenty-four rupees.

hna-pe: or ta-mu: = 2 annas. le:-be or ta-mat: = 4 annas.

ngā:-mū: = 8 annas (there are 10 small mū in one rupee).

ta-gyat mat-tin: = 12 annas (lit. one rupee minus 4 annas.)

tā-gyat mū:-din: = 14 annas (lit. one rupee minus 2 annas)

The words used for the smaller coins are:

pè: for anna (rath of one rupee).

paing for pie (rath of one anna).

pais-hsan for pice (3 pies or 4 quarter for one anna).

Thus four rupees five annas three pies would be ngwe le:-gyat ngā:-be: thon:-baing.

Verbs.

(L §285-286. J §108, 100, 111). Verbs have no personal inflections; they have two moods, the indicative and the imperative, and three tenses, the present and the past (which are in the same form), the future and the perfect. Other tenses are mentioned by grammarians but they are merely formed by using different conjunctions with the verbal roots and they are not tenses properly so called. The most important particles in forming tenses and moods are:

Indicative Mood.

Present and past—thi (or i)—thu pe:-thi (or i) he gives or he gave.

Future—myi or leim-myi—thu pe:-myi (or leim-myi) he will give.

Perfect or pluperfect—pyī:-byī or pyī-thū pe:-pyī:-byī he has (or had) given.

Note—leim-myi is a contraction of le, euphonic affix, and an, literary future affix, and carries an idea of possibility or eventuality.

Word order—The tense particle always follows the verb.

Imperative Mood.

(L. §297-301. J. §111-112). This mood is formed by using the verbal root alone or the verbal root with taw.

The verbal root alone or with taw forms a very strong and peremptory command. It is used only by persons in authority to their inferiors or by those who through anger or displeasure assume a tone of authority over others.

In addition to taw the following affixes are also used:

The polite affixes are very often used with the more imperious to soften down the harshness of an order or two of the polite affixes are used together.

^{*} Laik is almost entirely confined to colloquial speech.

```
thwā:-daw
thwā:-laik
thwā:-le

thwā:-ba-daw
thwā:-laik-pā
thwā:-laik-san:
thwa:-on:-daw

thwā:-bā
thwā:-ba-on:
thwā:-ba-on:
thwā:-zan:-bā
```

The affix hie is used to imply motion towards the speaker.

hno :-hle come and awake (me).

hke (L. p. 193) is used in the same way with the verbs yu to take, la to come, hkaw to call.

yū-ge bring here.

la-ge come here.

hkaw-ge call here.

With other verbs **hke** indicates that the doer is to go and come away from a place after doing the action indicated by the verb.

kyi-go look (and go or come away). sa-ok-ko pe:-go give the book (and leave).

The affix \mathbf{so} is used to express 'let us;' it is a colloquial affix.

thwa :-gya-zo let us go.

se implies a direct command given to a second person but affecting a third person. thwa:-ze make (him) go. The insertion of pā or pā-le between this affix and the verbal root changes the command into an entreaty addressed to a

person on behalf of a third person, thwā:-bā-ze or thwā: bā-le-ze (you) please let (him) go. By placing ya between pa and se the third person is changed to the first person, thwā:-bā-ya-ze please let (me) go.

se or pā-ze (J. §113) when prefixed to thaw and following a verbal root expresses a wish, thin-kaung:-sa:-bā-ze-thaw may you be prosperous! thin a-thet she-ba-ze-thaw may your life be long!

Plural of Verbs.

(L. §361-363. J. 116). Verbs form their plural by the addition of kya. When the subject in the plural is expressed, the plural affix may or may not be used with the verb. When the subject in the plural is left unexpressed, the affix must be used; if not, the verb will show that the subject is in the singular.

Word order.—The plural affix is always placed immediately after the verb except in the perfect when it is placed between **pyī**: and **byī**.

thu-do thwa:-gya (or gya-ba)-thi they go (or went).

thu do thwa:-gya-myi they will go.

thu-do thwa:-pyi: gya-byi they have (or had) gone.

thwa:-gya-daw go (very imperious).

thwā:-gya-laik se (very imperious).

thwā:-gya-laik-pa please go (imperious but polite).

thwā:-gya-bā
thwā:-gya-ba-on: } please go (very polite).

Infinitive.

[L. §288 310-312.]. §123 and 125 (2 and 3)]. There is no infinitive* proper in Burmese but there is an infinitive of purpose or gerund which is formed by combining a verbal root with yan or hpo

^{*} In many cases where we use the infinitive, Burmese use auxiliary verbal affixes, the use of which will be explained hereafter. ya-le-thi he wishes to get:

This gerund is used to express:

(a) end or purpose:

thū-thī kyi-yan lā-thī he came to look, yaung:-yan (bo) kon-mya: goods to sell, pe:-yan (bo) lā-thī he came to give.

(b) necessity

a-lok-lok-yan shi-thī I have work to do. kyue:-myī-pe:-yan a-ni:-nge-hmya shi-bā-thī (1) have only a small debt to pay.

End or purpose may also be expressed by:

- (a) a verb in the future tense in myi *_thū-thī yaik-myi lā-thī he comes to beat.
- (b) the conjunction aung (L. §401. J. §109) meaning that, 'in order that.'
- (c) a verb used adverbially; (L. §307) thū-thī mi-mi-nyi-go a-kyi-a-shu + lā-thī he comes to see his younger brother.

kyun-nok-ko ein-hmä a-saung-htä:-ge- $th\hat{i}$ (he) left me in the house to watch.

yan is often used to form a verbal noun: a-ye-baing-min-thā-hkin-hpā-yā: shauk-yan petition to his honour the Deputy Commissioner. myā-ma-sā-gā: thin-kyā:-yan hket-thā-lā: is it difficult to learn the Burmese language?

Other Tense Affixes.

There are a number of affixes used in forming tenses in addition to those already mentioned.

^{*}Sentences ending in myi are really sentences with words spoken in which hu has been omitted, thus the sentence given means 'he came saying I will beat.'

⁺ Stevenson (D. p. 1) states that this is a colloquial form.

Present.

The affix hse:* indicates present time and requires the insertion of shi or hpyit between it and the verbal affix.

yā-hku a-hkā yon-daw-dwin sit-me: shin:-lin:-zê: shi-thī (the case) is now being inquired into and settled in court.

Imperfect.

(L. §329). A tense corresponding to our imperfect is formed by placing the verb ne (to stay, remain) directly after the verbal root kyun-nok saung-ne-thī I was waiting.

Future.

(J. §117). myi or leim-myi with the verb repeated and kaung: after the first verb is used to denote the probability of a future action, kyun-nok thwa:-gaung:-thwa:-myi (or thwa: leim-myi) I shall probably go.

Taw Sein Ko (p. 77) gives it as a colloquial affix signifying the continuance of an act and as the sign of the progressive tense.

Stevenson (D. p. 443) states that it indicates present time, very often with the same force as lyet and that in common usage it denotes the immediate future and is often used with lu yauk-lu yauk-hse: on the point of arriving.

Lonsdale [§328 (5)] states that it is used to denote an action as on the point of beginning and requires the insertion of shi or hpyit between it and the verbal affix—kyun-nok sā:-zê:shi-thī I am about to eat, thim:-baw yauk-she: shi-thī the ship is about to arrive. When hse: is reduplicated, it intensifies the idea of the immediate occurrence of an event the hse:-ze: or the-myi hse:-ze: about to die.

^{*}There is some difference of opinion amongst grammarians as to the force of this affix.

Perfect.

(L. §330-338. J. §115). pyī:-byī* or pyī, hnin or le, hpū: and hke are alo used as past affixes.

* Lonsdale states that the difference between $py\bar{i}$: and $py\bar{i}$ is as follows: (L. §330 and 331).

pyī signifies 'to be replete, perfect, full' thī-hkā-le: sā-gā:-pyī-thī this speech of this child is perfect (i.e., clear, distinct)

Used as a tense auxiliary, pyī indicates that the action or state denoted by the verb has begun, but does not indicate whether it is continued or terminated and it has no corresponding tense in English. lu-gā-le: htā-mīn-sa:-byī the boy has begun to eat rice, thū ye-cho:-byī he has begun to bathe, hkā-le: eik-pyī the child has gone to sleep.

With intransitive verbs of motion, the English perfect may be used to translate pyī, thu thwa:-hyī he has gone, thu hta-byī he has risen: mī-thim-baw yauk-pyī the steamer has arrived.

pyī: signifies 'to be done, completed, finished 'th**I-a-lok-pyī:**-th**ī** this work comes to an end, th**ī-a-lok-pyī:**-m**yi** this work will come to an end.

pyī: combined with pyī indicates that the action or state denoted by the verb is completed and forms a tense corresponding to the English perfect.

thu sa:-pyī:-byī he had finished eating, he has eaten.

When **pyī**: is followed by a conjunction expressing time as **hlyin** or: **thaw** 'when,' **hma** or **nauk** 'after,' it forms a tense corresponding to the English perfect and pluperfect.

thū-sā:-pyī -hlyîn htwet-thwā:-lo-thī when he had eaten, he departed, thū htā-min:-sā:-byī:-nauk eik-tat-thī he is wont to sleep after he has eaten. thū htā-min:-sā:-byī:-hlyin lā-leim-myi when he has eaten rice, he will come.

Judson states (§108) that $py\bar{i}$ is a verbal affix denoting the past, sometimes the future, and is changed into $py\bar{i}$: when followed by another assertive affix.

hnin denotes the action to have been performed before some other past event and is sometimes considered as forming a pluperfect; it corresponds to our 'already,' 'before hand,' 'in advance,' thu sa:-hnin-byi he has already eaten.

le is used in the place of or in conjunction with hnin, kyun-nok tā-dā:-tho yauk-hlyin mi-thim-baw htwet-thwā:-le-byī (or htwet-thwā:-hnin-le-byī) when I arrived at the wharf, the steamer was already gone.

hpū: conveys the idea of 'before,' 'ever,' thī-sa-ok hpat:-hpū-byī (1) have read this book before, thī sa-okko hpat:-hpū:-thā-lā: have (you) ever read this book? In negative sentences sā is often prefixed to hpu: thīa-thi-go mā-sā:-sā-bū: (1) never ate this fruit before.

hke denotes the occurrence of an event at a place and time other than those of which the person is speaking or writing, kyun-nok sa:ge-byil ate (and left); thu pe:ge-myi he will give (and leave).

When hke is used with the verbs yu to take, la to come, hkaw to call, it implies motion towards the speaker; yu-gebring here, la-ge come here, hkaw-ge call here.

Causative Verbs.

(L. §245. J. §118) These verbs are formed by affixing so to other verbs, thu-go lok-kaing-ze-thī (I) made him work, hkā-lo-go thwa:-ze-thī (I) made (the) child go, sa-ok-ko kya-ze-thī (I) caused (the) book to fall.

Transitive Verbs.

(L. §246 and 441. J. §106) Some intransitive verbs are made transitive by aspirating the initial consonant of the

verb, or if it has a corresponding aspirate by changing it for such aspirate.

kya to fall cha to throw down or put down

kyan to remain chan to leave out

nein to be low hnein to lower

nyut to be bent to stoop hnyut to bend

In the two following verbs ya-yit of the intransitive is changed into ya-pin in the transitive.

kyauk to fear chauk to frighten che to crush

Passive Voice.

(L. §280-284.) There is no passive voice in Burmese—the passive idea is rendered by using an active verb and understanding the subject, thus 'this book was printed last year' is rendered (I-we-they) printed this book last year, thī-sa-ok-ko mā-hnik-ka pon-hneik laik thī.

Some grammarians hold that intransitive verbs such as **kya** to fall, **nyut** to stoop, to be bent, are used as passive verbs and that **hkan** (to bear) is used in the same way, but in such sentences as **sa-ok kya-**thī the book fell, and **thū-**thī **nga-a-yaik-hkan-**thī he received (suffered) a beating from me, **kya** is merely an intransitive verb and **hkan** a transitive verb

Some Burmese verbs have a passive meaning and others have both an active and a passive meaning:

myi to be called or named.

hso to speak, say or to be spoken, said.

hu to speak, say or to be named, called.

twin to be named.

pyi: to finish or to be finished.

Compound Verbs.

(L. §443-448) are formed (I) by the union of a noun and a verb or (II) the union of two verbs:

(I) na:-htaung to listen (na: ear htaung to erect).

wun-myauk to be glad, to rejoice (wun: belly, myauk to be raised, elevated).

chaung:-hso: to cough, have a cough (chaung: wind, passage, hso: bad).

mye-taing: to measure (mye earth taing: to measure).

hkā-yi-thwā: to journey (hkā-yi:journey, thwā: to go).

mī:-htun: to light (mī: fire, light, htun: to illuminate).

(II) Compound verbs formed by the union of two verbs are of four kinds.

(1) Those whose elements are synonymous or nearly so.

yaik-hnet to beat.

kyi-shu to look at, look after.

po-hsaung to convey.

(2) Those whose elements though not exactly of the same meaning are clearly allied to each other.

lok-kaing to work, do, make (lok to do kaing to hold, handle).

saik-pyo: to set seeds or plants (saik to set pyo:
 to plant).

chet-pyok to cook (chet to cook pyok to boil).

hkwe-we to divide (hkwo to split we to distribute).

(3) Those whose elements are in no way connected in meaning

yaung:-we to trade (yaung: to sell, we to buy).
hsin-hso to repeat, issue (an order) (hsin to place

300 to 1-

one upon another hso to speak).

(4) Those consisting of two elements the first of which is a verb or an adjective used as a verb and the second a word whose meaning is obscure.

kyan-zi to contrive, plan.
pyet-sī to perish, be destroyed.
yo-the to respect.
ke-ye to revile.
so-yein: to be anxious.
hkin:-gyin: to arrange.
taing:-dan to complain.
taung:-ban to entreat, to beg.
shā-bwe to search.
hpan:-zī to arrest.

Pali Verbs.

(L. §446). Pali verbs are formed by uniting Pali nouns with Burmese verbs.

tha-di-hta: to be careful, beware (tha-di atten-

tion hta: to place).

a-ma-hkan to agree to, take responsibility, stand security (ā-ma affirmation, yes, hkæn to bear).
gā-di-htā: to promise (gā-di promise htā: to put, keep).

dan-pe: to punish (dan punishment, penalty pe:

to give).

Affirmation and Negation.

Yes' and 'no' are less used in Burmese than in English, and the ordinary way of answering a question is

by repeating the verb, thu-do hta-min:-sa:-tha-la-ma-sa:-ba. Are they eating rice? No.

hok-thī, hok-pā-thī, [hok-ke] mean true, it is so, ves.

ma-hok, ma-hok-pa, [ma-hok-hpu:] mean not true, it is not so, no, not.

waung:-byi (it is well) means 'very well,' 'all right.'

When addressing persons much superior in rank, the following forms may be used for 'yes':—

bman-ba (it is true).

u:-tin-ba (lit. I place your order on my head).

u-htelk yuet-pa (lit. I carry your order on the top of my head).

In differing from a superior, or describing anything connected with an inferior part of the body, the following words are generally prefixed:—

thi-nyin: (or thi:) hkan-bā (lit. please be patient or forgive).
kā-daw-bā-ī (lit. I beg your pardon).

There formulas are also used amongst equals in making an apology and the first is then used to younger people and the second to elder people than the speaker (S. p. 175).

Negation.

(L § 341-355. J. § 120). In the persent and past tenses in thi or i the negation is expressed by prefixing ma to the verb omitting the tense affix thi or i

thu pe:-thi he gives or gave—thu ma-pe: (or ma-pe:-ba) he does not or did not give.

The negation may also be formed by using mā-hok (is not true) which is more emphatic than mā, thū pe:-thī mā-hok (lit. his giving is not true.)

In the future in myi the negation is not expressed by mā alone but by mā-hok, thū-pe:-myi mā-hok he will not give,

The perfect affix **pyi** when used with a negative is often used for the purpose of expressing intention, resolution or promise: thu ma-la-by i ordinarily signifies 'he has not come' but may mean 'he does not intend to come.'

In order to avoid the ambiguity attached to the use of **pyi**, Burmese generally employ a verb in the negative in the present or past tense and say 'thū mā-lā, instead of thū mā-la-byī' or they add 'the:' yet, thū mā-lā-tho: he has not yet come.

The polite particle pa is generally used in negative sentences thu ma-pe:-ba he did not give.

There are two instances in which the negative ma is used with the tense affixes thi or myi.

- (1) in a question thu ma-pe:-tha- (or myi) la: does or did (or will) he not give?
- (2) in a noun clause, thu pe:-thi (or myi) ma-pe:thi (or myi)-go ma-thi-ba I do not know
 whether he gave (or will give) or not.

In colloquial hpū: is used in the place of the particle thī with a present, past or future tense: thū mā-pe:-bū: may mean 'he does not, did not or will not give.'

In the imperative mood (L. \$209. J. \$111), the negation is expressed by mā with hnin; mā-pe:-hnin do not give—the polite particle pā is used to soften the harshness of an order, mā-pe:-kā-hnin, please do not give.

Word order.—mā is generally placed immediately before the verb. In the perfect tense formed with pyī: the

negative ma is prefixed to pyī;, thu sa:-ma-pyī: he has not eaten.

In the imperative the verb is placed between $\mathbf{m}\tilde{\mathbf{a}}$ and $\mathbf{h}\mathbf{n}\mathbf{i}\mathbf{n}$.

The negative ma is placed:

- (a) between the noun and the verb in compound verbs formed of a noun and a verb; thu na:-ma-htaung he does not listen;
- (b) before the compound verb or before each part of the compound in verbs which are synonymous, nearly synonymous, unconnected in meaning.

thu ma-yaik-hnet or thu ma-yaik ma-hnet he did not strike.

thu mā-lok-kaing or thu mā-lok mā-kaing he did not work.

thu ma-yaung:-we or thu ma-yaung: ma-we he did not trade.

- (c) before the compound verb in verbs of which the second part has lost its meaning—thū mā-kyan-zi he did not plan;
- (d) in honorific verbs before mū which is really a verb, bā-yin pyon-dāw-mā-mū the king did not smile.

Interrogation.

(L. §340. J. §110). All interrogative sentences terminate in interrogative affixes which are placed after the tense affix. The **thi** when followed by an interrogative affix is often shortened to **tha**.

In questions to which the answer is simply 'yes' or 'no' the affix is used.

In questions to which the answer is not simply 'yes' or 'no' the interrogative affix le: must be used.

The broad practical rule is that le: must be used when myi or be occur in the sentence and in all other cases la:

thu pe:-tha-la: does (or did) he give?

thu pe:-myi-la: will he give?

thu pe:-pyī:-byī-lā: has (or had) he given?

be-thū-le: who is he?

be-thwa: -myi-le: where are you going?

myi-hmya pe:-tha-le: how much did you give?

be-gyaung mā-lā-thā-le: why did you not come?

Word order.—The interrogative affixes are always placed last.

Idiomatic use of Burmese Verbs.

There are many differences in the use of Burmese and English verbs.

(a) The same verb often has both an active and a passive meaning, thus:

hū to call, name or to be called, named myī to call, name or to be called name. hso to say, speak or to be said, spoken. peik to shut or to be shut. hti to touch (strike) or to be touched, struck (hti-hkaik).

or to be wanting.

saung to watch over or to be watched over.

ye-cho: to give a bath or to bathe.

(b) Other verbs have two different and sometimes opposite meanings:

thin to learn or to teach.

kyā: to hear or to inform, report.

che: to lend or to borrow.

hngā: to rent or to hire.

hkan to receive or to apply for.

(c) Two verbs are often used together when a verband an adverb would be used in English.

htwet-thwā: to go out and go, to go away.

pye:-thwā: to run and go, to run away.

yū-thwā: to take and go, to take away.

lwè-thwā: to carry and go, to carry away.

laik-lā to follow and come, to come along.

yaung:-cha to sell and send off, to sell off.

(c) The idea of place or direction or the manner of doing a thing is often described in verbs.

hpyit = to be (without any reference toplace).

shi = to (be with reference to place.)

htā: = to place (generally).

tin = to place (above). to place (before).

hte - to put in.

hse: = to clean by water (hands, plates, etc).

shaw - to wash (clothes or hair by rubbing).

hput - to wash (clothes by beating).

thit = to wash (face).

chī = to carry (by lifting).

hsaung = to carry.

kaing = to hold, carry (in hand).

the - to carry from one place toanother.

htan: - to carry on shoulder.

- to carry on back (or in womb).

yuet - to carry on head.

yaik = to strike.

hkat = to strike (by side blow) hence applied to fanning, rowing, and foot-ball.

pok = to strike (with hand).
hkok = to strike (with sword).

hto: - to strike (from shoulder) with fist.

htu - to strike (by pounding).
htaung: = to strike (by pounding with the elbow).

Verb 'to be' and 'to have.'

(L. §253-260). To be is translated into Burmese by

- (α) shi when some idea of place is conveyed, such as "is here," "is there," "is in," kyundaw-myo-thā: ein-hmā shi-bā-thī my son is in the house.
- (b) hpyit when there is no idea of place, thī-lū kyun-daw-myo-thā: hpyit-pā-thī this man is my son.

Note.—When the verb "to be' is used with a possessive adjective in the sense of "to possess," "to own," it may be rendered in Burmese by 'paing.' Thus, "Are these your fields?" would be thī-lē-mye-go paing-thā-lā;"

To have is translated into Burmese by-

(a) shi with a noun followed by the preposition hmā "in." Thus "I have the book" would be "in me the book is." kyā-nok-hmā sa-ok shi-thī.

(b) pā " to accompany," "to be with," "to be contained," "to be included," "to be mentioned," used to render the English "to have with one," "to have brought." Thus, "have (you) (a) cigar (with you)?" would be: hse:-leik pā-thā-lā: "Have (you) brought (a) gun?" thinnat pā-thā-lā:

Note.—The verb **hpyit** is never used with simple adjectives of quality, because these adjectives are turned into verbs by the addition of a tense affix.

Note.—The verbs hpyit and shi are often understood especially in interrogative sentences

Other meanings of shi and hpyit.

From meaning 'to be here' shi comes to mean 'to live,' to exist,' especially when used in the positive with the: 'yet' or in negative sentences. min-mi-ba shi-the:-tha-la:, ma-shi-ba, are your parents still alive, they are not.

In addition to meaning 'to be' hpyit has various other meanings, i.e., 'to become,' 'to happen,' 'to take effect.' 'to accomplish,' 'to be practicable.' kyun-nok hsā-yā hpyit-thī, I am a teacher or I become a teacher. In simple negative sentences hpyit invariably means 'become' kyun-nok hsā-yā mā-hpyit, does not mean 'I am not (a) teacher' but 'I did not become (a) teacher.' To convey the idea of 'be' in such a sentence the verb hok, 'true,' must be used in place of hpyit as kyun-nok hsā-yā mā-hok (lit. I a teacher not true) I am not a teacher.

When shi is used with yan it often has the meaning of 'to have to.' ta-ya-hkan-do-tho kyun-daw-ma-ga kyue:-myi-pe-yan a-ni:-ngo-hmya shi-ba-thi. I have only (even) a small debt to pay to the accused.

mit

Both shi and hpyit are often used at the end of noun clauses in a redundant manner and could be rendered by 'to happen,' but this is an idiomatic use of these verbs and they need not be translated in such sentences. (See Noun clauses $p.\ 80$).

shi is also sometimes used to mean 'it may be that,' 'it is possible.' ngā-do pyan-ya-thī mū-li: shi-thi mā-pyan-ya-thi-mū-li: shi thi it may be that we return or that we do not.

Adjectival Verbs.

(L. §151 (6). All adjectives of quality and two adjectives of quantity, myā: many and ni: few, little, may be used as verbs by adding to them the tense particles thī or i, myi or pyī:-byī, and these adjectival verbs form their interrogation and negation in the same manner as ordinary verbs.

thī-hkā-le: hso:-thī this child is (or was) naughty.
thī-hkā-le: hso:-thā-lā: is (or was) this child
naughty?

thī-hkā-le: mā-hso: this child is (or was) not naughty.

thī-hkā-le: mā-hso:-thā-lā: is (or was) not this child naughty?

ma-hso:-hnin do not be naughty. kaung:-myi (it) will be good.

kaung:-byī (it has been well) very well, all right.

It should be remembered that as Burmese adjectives can be changed into verbs by the addition of the tense particles, they can never be used with the verbs shi to be (here) or hpyit, to be, to become. The following senten ces are apparent exceptions to this rule: a-hpo:-gyī:-thī-kyan:-gyan: mā-mā shi-the:-thī the old man is still hale and strong. min:-gyi-hsin-daw a-me: hpyit-thī the king's elephant is black. thī-pan: a-hla-zon: hpyit-thī this flower is the prettiest, but the words which are translated

by adjectives in English are not adjectives in Burmese. **kyan:-gyan: mā-mā** is an adverbial form and **a-mē:** and **a-hla-zon:** are noun forms of the adjective.

Auxiliary verbal affixes.

(L. §360. J. §117). A large number of verbal and adjectival roots which are used after verbs to express some additional idea often change their original meaning when they are so attached to verbs.

Meaning when used alone.

Meaning when following another verb.

u: to begin, be first.

• More,' 'again,' 'yet,' also used as a polite imperative affix. In negative sentences, it invariably means 'yet.'

As an auxiliary, it is pronounced on:

sa to begin, be first (always followed by the verb **pyu** 'to do.')

Retains same meaning.

at to be fit, proper, suitable
kaung: good
htaik to be worth, to have
a certain value.
ya fit, proper, right
lyaw suitable, proper, becoming
thin suitable, proper, be-

coming

Right, proper, ought, should.

alone.

Meaning when used Meaning when following another verb.

naing or hnaing to prevail, Able to, can (=pouvoir). conquer, win

tat to know, understand, ((1) skill, knowledge (= savoir) to be skilled

(2) habit or wont

(3) native character, essential quality or property

chin (never used alone)

to wish, desire, to have a tendency to

lo to desire, wish, want

Retains same meaning

se to send

(I) to cause to happen (2) to permit, allow, let

san: to try

Used as polite imperative particle

me to remain, abide, stay

Used to form a present or imperfect tense

pyan to return, repeat, interpret, translate, etc.

To take up or do again, to repeat, resume

hpyit to be, become, etc.

To take effect, be practicable, possible to happen; often corresponds to 'for certain,' 'without fail'

mi to get hold of, to take captive

Implies accident or chance negligence or inadvertence

mye: constant, permanent

'To continue the same,' 'as usual,' 'customary'

Meaning when used alone.

Meaning when following another verb.

ya to attain, get, gain, obtain

(1) implies compulsion, obligation, necessity, duty or (2) opportunity, privilege of getting or gaining

In negative sentences ya when used with a verb in the second person expresses, 'prohibition.' In the third person it implies either prohibition or absence of opportunity.

laik to follow, accompany

Implies the following out or carrying out with complete effect of an action.

we easy

Implies that the action is done without difficulty or hesitation

hie to turn round

Implies motion towards the speaker.

wun (never used alone)

To dare.

tha pleasant, clear

Free to do, — to have the opportunity, to be proper, to have room.

Many of these verbs are often used impersonally in English, but they are always used personally in Burmese. ma-yon-thin-thaw-thu-go ma-yon-yā. It is not proper to trust (lit. they should not) those who should not be trusted.

(L. §357. J. §118.) Other verbal affixes are particles having no particular meaning of their own but add something to the meaning of the verb they are attached to.

che (J. §118). conveys the notions of:

- (a) to proceed to an action, thin sā:-gye you (proceed to) eat, ngā ye:-gye-myi I will (proceed to) write;
- (b) the realization of an action, thu Man-da-le:-myotho thwa:-gye-thi he (really) did go to Mandalay.

taw (J. §117.) is employed with the following meanings—

- (a) permissive force, thin sā:-lo-hlyin sā:-daw if your wish to eat, you may eat;
- (b) nearness of an event, kyun-nok thwa:-daw-myi I will go (immediately), mi:-thim:-baw yauk-taw-myi the steamer is about to arrive or will arrive soon;
- (c) finality, **kyun-nok-to-hmā the-yan-**thā **shi-daw-**thī (as for us) we are (as a final issue) only to die, or there is nothing but death left for us;
- (d) needlessness when affixed to hain in prohibitive sentences, hto-tho-hpyit-yue thin-do pin-ban:-yon-hmya-thā hpyit-myi ma-thwā:-gya-hain-daw. That being so, you will merely tire yourself, you need not go.

5-26 Sept 126 -

Note.—With taw meaning 'immediately' the verbs: hpyit and shi are often used and must be used if the verb is followed by a conjunction: mi:-thim:-baw yauk-taw-myi shi-hlyin when the steamer was about to arrive.

yet (from yet-set to be cruel).

- (1) in affirmatory sentences implies that the agent is cruel or unfeeling enough to perform the action denoted by the verb, thū-thī mi-mi-nyī-yin:-go-bin that-pit-yet-thī he heartlessly murdered even his own younger brother.
- (2) in negative sentences it implies that the agent has not the heart to perform the action thu-tha:-go chit-thaw-gyaung. tā-yan-tā-hkā-hmya māyaik-yet because he loves his son, he cannot bear (has not the heart) to beat him at any time.

yit 'to stay behind,' kyun-nok pyu-yit-thī remaining behind I did it, thū ne-yit-thī he remained behind, thin ne-yit you stay behind.

shā implies commiseration or sympathy on the part of the speaker. thu the-sha-byī he is dead, poor fellow.

Note.—The affix sha always follows the verb in Burmese and not the noun as in English.

pā expresses politeness or deference and must be used with the verb when an inferior speaks to a superior in age or rank. It is also used by superiors addressing inferiors politely. It corresponds to the English 'please' but it may be used with any tense of the verb and not like 'please' with the imperative only.

thu-do la-gya-ba-thi they come (or they came).

hpā-ya-kyun-daw a-sī-yin-daw-hkan-bā-thī I beg to report for orders.

kyun-daw-myo: thwa:-ba-myi I will go.

thu thwa :- pyī :- ba-byī he has gone.

thwa :-laik-pa

thwa :-ba-daw > please go.

thwa:-ba-on:

Word order.—In the present and future tenses **pā** is placed immediately before the tense affix. In the perfect it is placed between **pyī**: and **byī**.

In the imperative **pa** is generally placed last, but it always precedes **taw** and **on**:

The honorific affix.

[L. §106 and 339. J. §125 (6).] taw is often found used after nouns and verbs. It signifies 'pertaining or belonging to a deity, king or government,' It is affixed to a noun or a verb to indicate that the thing or action denoted by the noun or the verb is connected with divine, royal or sacred persons or persons of high rank. hsin-daw royal elephant, kyaung:-daw royal monastery, tha-mi:-daw royal daughter, yon:-daw royal court. When taw is affixed to a verb, it is always followed by mu'to do'to perform.'

min:-gyī: pyon:-daw-mū-thī the king smiled.
min:-gyī: pyon:-daw mū-thā lā: did (the) king smile?
min:-gyī: pyon:-daw mā-mū (the) king did not smile.

Honorific verbs and nouns.

Differences in social position which are sharply marked in Burmese in the use of pronouns and of the honorific particles taw and taw-mū are still further emphasized by the use of different verbs and nouns in speaking of acts done by or to persons of different rank.

Adverbs.

- (L. §451. J. §126). Adverbs are formed from adjectives or verbs by
 - (1) affixing swa to adjectives, kaung:-zwa or kaung:
 -mun-zwa well.
 - (2) prefixing a to adjectives or verbs, a-lun or a-hlun very, exceedingly, from lun to exceed; a-myan quickly, from myan quick. In compound adjectives or verbs a is prefixed to each part a-lyin-a-myan quickly from lyin-myan quick.

(3) reduplicating an adjective, kaung:-gaung: well, hne:-hne: slowly. In compound adjectives both parts of the compound are reduplicated, thā-thā yā-yā pleasantly from thā-yā pleasant.

Note.—All these forms are used in modern Burmese, but the first is literary, the second, modern and the third, colloquial.

Other methods of forming adverbs are by:

(a) prefixing a or ta to the first or both parts of a reduplicated adjectival or verbal root, ahtū:-dū: diversely, particularly, from htū: diverse; singular, a-thī:-thī or a-thī:-a-thī: separately, severally, from thī: to be separate; tā-pyaw-byaw incessantly talking, from pyaw to talk.

When the word is a compound, a or ta is prefixed to each part, a-htū:-dū: a-hsan:-zan: extraordinarily, from htu:-zan: extraordinary.

The adverbs containing to imply the continued repetition or recurrence of an action.

(b) prefixing a to the first and ta to the second part of compound adjective or verb, a-hsaw-da-lyin hastily, a-lwe-ta-gū easily.

Reduplicating a verbal root and prefixing ma to the first part and ta to the second ma-myin-da-myin almost seeing, ma-hmi-da-hmi almost reaching.

- (c) reduplicating a verbal noun formed with a and omitting a, in the second part, a-lo-lo 'of one's own accord' from a-lo 'wish,' a-kyeingyein' often' from a-kyein' time,' 'turn;' a-thaung: 'by thousands' from a-thaung: 'ten thousand.'
- (d) affixing the adverb ti: 'only' to a verbal noun formed with a which is changed to tā in the combination, as tā-nyī-di: (only even)' all together' from a-nyī' evenness,' tā-sat-ti: (only adjoining) 'immediately adjoining,' from a-sat a joint, a seam.
- (e) in addition to these there are many adverbs for which no rule can be given:

a-so:-da-ya authoritatively.
a-na-da-ya sorely, grievously.
a-hlun-da-ya exceedingly.
a-hmat-me
a-hmat-ta-me
unconcernedly.
a-chein-me
unseasonably.

[L. §357 (5) and 377. J. §126 (7).] tha means only when applied to a verb and the verb to which it is affixed is then repeated. thu-kyi-tha kyi-thi he only looked, sa:-tha sa:-ba please only eat. It is often combined with ti: following a numeral affix preceded by a number, lu ta-yauk-ti:-tha la-thi only one man came.

ti: (J. §103) also means 'only 'myin: ta-gaung-di: the-thī only one pony died. It is more emphatic than tha.

tha is also used as an adjective; it is equivalent then to the English only in the sense of alone (solitary) none but, thu hta-min:-go-tha sa:-th he eats only rice; thu-tha hso:-th he alone is wicked. It is sometimes com-

No ? form (much) grapem

bined with hlyin which intensifies the idea of exclusiveness. thu- $th\bar{a}$ -hlyin hso:- $th\bar{i}$ only he is wicked.

Word order.—When tha follows a noun or pronoun in the nominative, the case affix is suppressed, nga-tha I alone. In other cases tha is placed after the case affix, nga-go-tha chit-thi (he) loves me alone.

sī [J. §126 (7).] means 'separately,' 'singly,' 'individually 'and it corresponds to the English 'each.' thū-do-hmā nwā:-tā-gaung-zī shi-gya-thī, they each had a bullock. thū-do-thī thin-nat-tā-let-sī yū-lā-gya-thī, they each brought a gun. thū-do-go ngwe-hnā-kyat-sī pe:-bā, give them two rupees each.

Word order.—sī always follows the numeral affix and when possible it is used with the accusative and not with the nominative.

hlyin is used in the same way as $s\bar{l}$ and corresponds to 'a' and 'per' in such sentences as 'once a month' 'a shilling per head.' When the word preceded by a numeral relates to time hlyin may be omitted, thu-thi ta-la-ta-gyein $l\bar{a}$ -thi he comes once a month. ta-ya-hkan-thi hsi-gyein ta-hse-hlyin ko:-gyat-ze:-hnon:-hnin hsi-gyein-ta-ya-go we-yū-bā-thi the defendant bought 100 viss of oil at tha rate of Rs. 9 per 10 viss.

Note.—hlyin is the conjunction 'if' and five per cent. is rendered in Burmese tā-yā-hlyin ngā:-gyat if one hundred five rupees.

a-thī:-thī: 'severally' may be used in conjunction with sī or instead of it.

Note.—The verb kya' to fall 'is often combined with hlyin or sī and means 'at the rate of 'yua-thā-:-do-thī tā-ein-hlyin tā-yauk-kya myo-go thwā:-ya-gya-thī the villagers had to go to town a man per house. thū-do-thī tā-go-hlyin shit-pē:-gya pe:-gya-thī they paid 8 annas per man.

chī: means 'only, merely, nothing but 'lū-do-gyi: men only, nothing but men thwā:-thī-gyi: he only goes, he does nothing but go. ngā-li: let-chi: hpyit-hkē-thī l am also empty handed (nothing but the hands). pon-nā: then:-yauk-ko thī-ni:-gyi: hso-yue taung:-daw speak to three Brahmins in the very same manner (this manner only) and ask them.

chin: (J. §103). 'Single one,' 'only,' tā-ne-gyin:-dwin in a single day, tā-nyin:-gyin:-dwin in a single night.

the: (J. §115). 'Still, yet,' in affirmative sentences means 'still' thu $s\bar{a}:-the:-th\bar{\iota}$ he still eats, thu $e\bar{\imath}k$ -the:-th $\bar{\iota}$ he still sleeps. In negative sentences, it signifies 'up to the present time, yet' thu mā-sā:-the: he does not eat yet.

Word order.—the: is always placed immediately after the verb.

hla (J. §117). Used as an adverb has the same meaning as a-hlun 'very,' mā-ne-nya-ga kyun-daw mā-eik ya a-hlun-pin-ban:-hla-thī last night I could not sleep, I was very much worried. thū hsin:-ye:-hla-bā-thī he is very poor

Word order.—hia always follows immediately the verb or adjective whereas a-hiun always precedes it.

Note.—the: cannot be used with the imperative in the negative; on: is used in its place to mean 'yet' mā-thwā:-hnin-on: do not go yet.

The adverb hmya.

(L. §136). hmya means 'much,' 'as much as,' 'so much as,' 'as many as,' 'even.' It is often corrupted to hma both in writing and speaking.

Combined with $th\bar{\imath}$ and hto it means 'as many as,' 'as much as,' $th\bar{\imath}$ -hmya-lauk $l\bar{\imath}$ -do $l\bar{a}$ -gya- $th\bar{\imath}$ as many men as this came, hto-hmya-lauk $ht\bar{a}$ -min:-go $s\bar{a}$:- $th\bar{\imath}$ he ate as much rice as that,

It is combined with **be** and **myī-thī** in questions relating to number, definite or indefinite, **lū myī-hmya shi-thā-lē**: (lit. as many as what men are there) how many men are there, **htā-min**: **myī-hmya sā**:-thā-lē: how much rice did you eat.

It is combined with a numeral affix preceded by ta to express 'even one,' 'as many as one,' and this combination is used with negative verbs and gives the idea of 'none' thī-hnit kyun-nok-kyue:-tā-gaung-hma mā-the (lit. this year so many as one buffalo of mine died not) none of my buffaloes died this year.

It is also combined with **be** and **myi-**thī used as indefinite pronouns **thū-**thī **be-kyaung:-go-hma mā-thwā:** he does not even go to any school.

[L. §377 (4).] Hmya or yue is often affixed to thi in its shortened form and means 'as many as,' 'whatever,' myin:-shi-thā-hmya-the-thī as many horses as there were died, kyun-nok pye:-naing-thā-hmya pye:-thī I ran as much as I could, yā-hku kyun-nok-to tat-naing-thā-yue sā-bā:-myā:-go su-hsaung: si-hnin tho-theik-yue htā:-bā-thī we are now collecting and storing as much paddy as we can, yue is seldom used in the written language and not at all in conversation; it is a form generally used in the literary language.

Prepositions.

(L. §421. J. 74). The number of prepositions properly so called is very small in Burmese, they are—

tho 'to' (with motion) or 'towards.'
hnin 'with' or 'from,' 'by.'
a:-hpyin or hpyin 'with, by, by means of.'
kyaung 'because of, on account of, owing to.'
hma or ka 'from.'
we, hnaik, twin, hma 'in, at' (without motion).

Word order.—Prepositions always follow the word to which they refer.

(J. §67. L. §95). hnin means 'with.' It is used to express the following ideas:—

(a) the instrument or means with or by which something is done, dok-hnin yaik-thi he beats with a stick.

It is also used to express the price for which a thing is bought or sold, also the commodity for which another is bartered, kyun-nok myin:-tā-gaung-go ngwe-hnā-ya-ngā:-zê-hnin wê-thī I bought a pony for (with) Rs. 250. thū-thī mi-mi-gaung:-baung:-go-ein-gyī-tā-htê-hninhtat-lê:-thī he exchanged his gaung-baung for (with) a jacket.

hnin is also applied to nouns denoting time, Yan-gon-myo-tho hna-yet-hnin yauk-la-thī he reached Rangoon in (with) two days.

(b) company, intercourse, union kyun-nok-hnin laikla-th] he came with me.

- (c) hnin expresses the exactly contrary idea when joined to verbs implying freedom from or separation from thu-thi mi-mi-ma-ya:-hnin kwa-thi he separates from (with) his wife. thin-do a-na-vaw-ga-hnin kin :-ba-ze may you be free from (with) disease, sickness,
- (d) In the sense of 'being with' or 'connected with 'hnin is used with the verb tu 'to be similar' thu myauk-hnin tu-thi he is like (with) a monkey. The prepositions hnin-atu 'together with 'hnin-a-nyi, hnin-lyawzwa 'in accordance with,' 'even with' are used in the same manner
- (e) cause or reason kyun-nok-thā:-thī a-hpyā:-yawga-hnin the-thi my son died of (with) a fever.

a:-hpvin and hpvin are literary forms used instead of hain when it means 'with,' by 'or 'by means of.'

kyaung means 'because of,' 'on account of' 'owing to' and is often used with verbal nouns, ye-kyī:-gyin :gyaung on account of floods.

hma and ka both mean 'from' but ka is more commonly used in modern Burmese than hma.

ka is also used with nouns of time expressed or understood to express the idea of 'past' 'last.' thu sa-ne-nega yauk-la-thī he arrived last Saturday. lun-ge-thī-tanin:-ga-nwe-ne-ga mī:-thim:-baw htwet-thwa:-thī the steamer left last Sunday. nauk-la-ga mo: a-hlun-yuathi it rained much last month.

we is a literary form almost obsolite, but still used in modern language in a few expressions such as let-we, hand No /gow

hnaik is a literary form, twin is chiefly used in writing and hmā is the more modern form—they have all the same meaning of 'in' or 'at' without motion.

They are also used with nouns of time to mean 'at,' 'on,' 'in,' ngā:-nā-yī-a-chein hmā (or hnaik or dwin) at 5 o'clock. hto ne-hmā (or hnaik or dwin) on that day.

hnaik, twin hma are however generally omitted when applied to time.

mat-la thon:-yet-ne nan-net hse-tā-nā-yī-a-chein mī:-thim:-baw hsaik-yauk-hlyin when the steamer came alongside on the 3rd March at 11 a.m.

They are also used with the verb shi in its meaning of 'to have.' thū-do-hmā (or hnaik or dwin) thā :-hnā-yauk shi-thī (in them were two sons) they had two sons. twin is also used to mean 'amongst' or 'amidst' thī-lū-ngā:-yauk-twin thū a-leim-mā-zon: hpyit-thī amongst these five men, he is the cleverest.

Other prepositions.

(L. §385). In addition to the prepositions already mentioned above, there are a number of other words, generally nouns, which are used as prepositions.

The most common of the words are:

taing or taing-aung 'till, until, as far as, up to 'from the verb taing 'to reach, to arrive.'

a-hti or hti 'until, up to,' from the verb hti 'to touch.

pat-ion: 'throughout, all through, beginning to end,' from a-pat 'circle, circuit' and a-ion: all. nga:-hnit-pat-ion: all through five years.

a-hpo 'for, on account of, on behalf of, for the benefit of, instead of 'from a-hpo' share portion.' The a of hpo is often omitted: kyun-nok-tha:-bo, for my son.

a-twet 'for,' from a-twet 'sake, benefit, account.

ke-tho like, similar to.'

a-taing: from taing: 'to measure'
a-laik from laik 'to follow'
a-lyauk from lyauk 'to accord with'
a-ya from ya' 'to get, to obtain'
according to,
agreeably to.

hnin-atū hnin-atū-ta-gwa together with, like with.

hnin-a-nyī
hnin-nyī-zwa
evenly with, accordance with.

pyin or a-pyin from a-pyin 'an outside' means 'be-sides' la-gaung:-pyin besides.

htet from a-htet 'an upper or superior part' means
above, beyond.

.ma-ka 'in excess of, beyond' is generally employed with htet in comparative sentences.

hma-ta-ba: 'except, apart from.'

hma-sa-yue 'beginning from,' often equivalent to the English 'and'

a-net from a-net 'a mass, collection, a whole' means among, from among, out of.'

Secondary Nouns.

It will be noticed that there are no such prepositions as 'on,' 'under,' 'above,' and to supply the place of these, Burmans have to use compound nouns denoting place or space with the prepositions mentioned above, thus 'on a tree' will be 'in the upper part of a tree,' 'under a tree' will be 'in the under space of a tree.' These compound nouns are called by some grammarians 'secondary nouns.'

The nouns denoting place or space are connected with the other nouns by which is generally omitted, thus thit-pini-auk-hma becomes thit-pin-auk-hma. The compound nouns in most common use are:

a-paw or a-htet upper part

ein-baw ein-det, house top, upstairs.

auk under part

thit-pin-auk under space of a tree.

a-pa or a-pyin outside, exterior

ein-ba ein-byin, exterior of (a) house,

a-hti: or a-hte: or atwin:, inside, interior, inner terior of a house part of space

ein-de : ein-dwin : in-

a-htan presence [hsi]

a-me-htan-tho to (the presence of) his mother; ahpe-htmn-ga from (the presence of) his mother.

a-na: side, border, space, near (a thing)

myo-nā: border of a town

a-nī: or a-nī:-a-pa: nearness, near part

myo-nī:, myo-anī:-apā: near part of (a) town

a-nya upper part (of a river, country)

myit-nya upper part of (a) river

a-kye lower part (of a river, country)

myit-kye lower part of (a) river

a-sha front or forepart

ein-she front of (a) house

u: forepart, fore-end

hle-u: prow of (a) boat

nauk space behind, hind part

ein-nauk back of (a) house

a-le middle

mye-le middle of (the) ground

pat-lī circuit

myo-pat-li surrounding space of a town

Note.—Several of these words are used to form compound nouns, not of space, but of time:

a-htet-hnit (the above year) last year.

a-htet- (or a-htek-ka) tha-gyī: (the above head-man) the former headman.

nauk-thauk-kya-ne next (or last) Friday.

she-thaw-a-hka in former times.

Co-ordinating Conjunctions.

Co-ordinating conjunctions are seldom used between words and still less between sentences. They are found in the literary language between words, but in the modern language they are generally omitted. They are little used between sentences because the Burmese do not like short abrupt sentences as we do in English but connect every sentence with something that goes before—thus, 'he came and said' would be in Burmese 'having come, he said,' 'he came but did not stay' would be 'although he came, he did not stay; 'is this river deep or shallow' would be 'is this river deep? is it shallow? 'I do not know whether he come or not' would be 'I do not know that he came, that he did not come.'

hnin is used to express 'and' but it is really the preposition 'with' a-hpe-hnin a-me (the mother with the father) the father and the mother.

hnin is never used to connect sentences.

yue is used to connect sentences; it forms a present or past participle and is equivalent to the English 'and' between two sentences: lū-ngā:-yauk ein-go a-tin:-win-yue ngwe-chauk-yā taung:-gya-thī five men entered the house forcibly and demanded Rs. 600 (literally having entered demanded). shin:-yuə sā:-bā:-bo:-ngwe-go pe:-laik-pā please settle up the accounts and pay (me) the price of the paddy (having settled up please pay).

th**o-thaw-li:** or **tho-thaw** or th**o-ya-dwin** mean 'but;' **thu** f**a-**thf th**o-ya-dwin** f**xya-myin-zwa ma-ne** he came but did not remain long.

a-pyin or pyin or hma-ta-ba besides' hle-tha-ma:-do-ga a-hka ma-ya-thi-pyin hle-gun myā:-zwā pe:-hsaung-ya-gya-thi the boatmen besides getting no hire, had to pay much revenue (= not only ... but),

ii: as an adverb means 'likewise, also, too,' as a conjunction it is often repeated and then means 'both.....and' and in negative sentences 'neither.....nor' thū-sā:-li: sā:-thī thauk-li:-thauk-thī he both ate and drank.

tho-mā-hok means 'or' (= tho-mā-hok-hlyin if it is not so). ye tho-mā-hok nā-no-go thauk-myi-lā: Will you drink water or milk:

Note.—The more idiomatic manner of rendering 'or' is to omit it or to repeat the sentences or clauses between which it occurs: le:-ngā:-yet four or five days. hse-ko:-vet nine or ten days.

thī-mylt net-thā-lā: tein-thā-lā: is this river deep or shallow? [J. §126 (7)]. As an alternative conjunction hpyitse means 'either or' hmin-dan-go-hpyit-se hke:-dan-go-hpyit-se yū-ge bring either a pen or a pencil.

Note.—In noun clauses 'whether ... or' is expressed idiomatically by repeating the clauses: thu la-thi ma-la-thi-go ma-thi-ba (1) do not know whether he came or not.

Subordinating Conjunctions.

Very few conjunctions are simple words of the language; these are **yue**. **!yet, be**: and **thaw**. Most of the conjunctions are taken from other parts of speech.

Conjunctions often affect the tense affix which precedes them; thus thi may be suppressed or altered to thaw or tha; myi is always suppressed; pyi:-byi is abbreviated to pyi: in all cases when thi would be suppressed, abbreviated or altered. No rule can be given regarding these alterations and they are tabulated for easy reference in Appendix III to which the student is referred.

Word order.—Conjunctions are always placed after the verb at the end of their clause and the subordinate clause must always come first, thus, 'I saw this man when I went to the bazaar' would be in Burmese bazaar to (I) went when, this man (I) saw ze:-go thwā:-hlyln thī-lu-go myin-bā-thī.

When the same word is the subject of the principal clause and of the subordinate clause, it is used in one clause only and omitted in the other—thus 'the dog ran into the jungle because it feared danger' can be translated

hkwe:- $th\bar{\bf i}$ be :-kyauk-thaw-gyaung taw-th0 win-pye :-le- $th\bar{\bf i}$ or be :-kyauk-thaw-gyaung hkwe: taw-th0 win-pye :- le- $th\bar{\bf i}$.

yue expresses:

- (a) A present or past participle and is then equivalent to the English 'and' between two sentences.
- (b) Cause or reason and means 'because,' as,' since,' it is then equivalent to **thaw gyaung**we-thū pā:-yue ze:-nā-hnon:-ga kya-boshi-thī because buyers are scarce, the market rate must fall.
- (c) Contemporaneous action when it is the equivalent of the English present participle, thu myin:-go-sī:-yue thwā:-thī he went riding a pony.

lyet denotes contemporaneous action and is the equivalent of the English present participle—kyun-daw-do-ga hkim-byā:-do-ā:-lon:-go kyam:-mā-gya-ze-yan ne-zin hsu-taung:-lyet shi-ne-gya-bā-thī we are praying daily that you may all be in good health.

lyet often means 'notwithstanding that...yet' or 'although' especially when combined with hnin—thin-go nga-tha-di-pe:-lyet-hnin me-lyaw-le-thī notwithstanding that I warned you yet you forgot.

kyaung means 'because of,' 'on account of,' 'owing to,' 'as,' mo:-yuā-thaw-gyaung ngā-mā-lā-bā I did not come because it rained.

hnin as a preposition means 'with,' by means of,' as a conjunction it means 'because,' as 'nga-hpya:-thi-hnin ma-thwa:-hnaing-ba (I) could not go because I had fever.

hpyin or ā-: hpyin as prepositions mean 'by means of' and as conjunctions 'by' or 'because,' 'as' kye-e:-thā-hpyin sā-yan-ngwe tā-yā let-hkan-gya-thī as they were satisfied, they accepted an advance of Rs. 100.

a-twet as a preposition means 'for 'and as a conjunction 'on account of,' 'because,' nauk-mo: a-ni:-nge-nyan-thi-a-twet a-thī:-a-hnan-myā:-hmā a-aung-a-myin ni:-bā-thī because the later rains were a little scanty, the crops are in somewhat bad condition.

thaw means 'when' or 'if' sometimes' 'as.' It is chiefly used in the literary language and is often preceded by the euphonic particle lat. kā-la she-lat-thaw when time had been long (after some time). mo:lin:-thaw when dawn came.

hlyin means 'when 'or 'if.' mo:-yuā-hlyin kyun-nok mā-lā-hnaing-bā if it rains, I cannot come.

a-ke-yue meaning 'certainly, indeed' is often used at the beginning of conditional clauses and followed by hlyin, thus, a-ke-yue kyun-daw-myo:-do shauk-thi-a-taing:a-hkwin:-ma-ya hso-hlyin if (you) should indeed say that we cannot obtain the favour (permission) we ask for.

ka as a preposition means 'from' and as a conjunction 'if.' It is often preceded by gye. ia-hpet-ko a-lo-shi-ga hma-hta:-laik-pa if (you) want green tea, please inform (me).

hma as a preposition means 'from' and as a conjunction 'after,' 'if.' mi-mile-dwet sā-bā:-myā: pyī:-hmakyun-daw-do lā-hnaing-gya-leim-myi we shall (only) be able to come after paddy from our fields is finished (garered).

hma-tha means 'only after' or 'only if.'

nauk as a noun means 'space behind' and as a conjunction 'after.' Yan-gon-myo-hma htwet-la-pyi:thi-nauk kyun-daw-thi le-mya:-go thwa:-yauk kyi-shu-ba-thi. After I had left Rangoon, I went and looked at the paddy fields.

be: is always preceded by a verb in the negative and means 'without,' thū mā-eik-hpe: ne-thī he stayed without sleeping. It also means 'instead of' thū htā-min:-go mā-sā:-be: ye-go-thauk-thī instead of eating rice he drank water.

ke:-tho as a preposition means 'like,' 'similar to' and as a conjunction 'as' 'as ... so,' 'like as so.' nga pyaw-tha-ge-tho thin pyu-lok-ya-myī you must do as I tell you.

lauk as a preposition means 'like' in degree or measure and as a conjunction 'as much as.' kyun-nok-to lo-gyin-tha-lauk ma-ya-ba we did not get as much as we wished.

(J. §75.) a-taing: 'according as 'kyun-daw hma-laik-thi-a-taing: according as I instructed (you). Frequently the tense affix thi and the a in a-taing: are omitted thin-hso-daing: hman-be-thi it is correct according as you say.

taing: or a-hkā-daing: 'every time,' 'whenever,' thū-thī kyun-nok-hsī-tho lā-thi-a-hkā-daing: (or lā-daing:) kyun-nok-hnin yan-hpyit-thī whenever he comes to my house he quarrels with me.

yā means 'as ' 'while ' and dwin is sometimes added to it. ngā htā-min:-sā:-yā-dwin thū-yauk-lā-thī whilst I was eating rice he arrived.

yā also mears 'when' and is then the equivalent of the English active past participle. hpā-ya-kyun-daw tā-ya-

hkan-htan ngwe-go thwā:-yauk taung:-yā mā-pe: when I went and demanded the money from the defendant (he) did not give (it). Bod-da-bā-thā Myā-mā-lū-myo:-do hton:-zan-shi-yā as the custom of the Burmese race and the Buddhist religion is.

sin means 'while,' 'during the time that' and is sometimes strengthened by the addition of twin. tha-hte:-tha: a-yat-ta-ba: thwa:-zin whilst the merchant's son was absent (had gone to another place.)

a-hkaik as a noun means 'time' and as a conjunction 'while,' 'during the interval that,' frequently the tense affix thi and the a of a-hkaik are omitted, ta-ya-tha-gyi: a-cha:-tho thwa:-gaik whilst the judge had gone elsewhere.

a-hkā (time) kā-la (time) and a-chein (hour) are all nouns which are used as conjunctions and mean 'when.' nauk-tā-yet kyā-thā-kā-la when the next day had passed.

twin as a preposition means 'in' and as a conjunction 'when.'

..... hlyin chin: (hlyin 'when' and chin; contraction of chet-chin; instantly) used together mean 'instantly when,' 'just as,' 'no sooner.....than,' 'as soon as,' 'the moment that,' sā-bā: ya-hlyin ya-gyin:a-hlun thi-lo-bā-thī (I) wish very much to know as soon as you get the paddy.

both mean 'before,' ma.....hmī is somema.....hkin what more literary than ma.....hkin. ma-kyā-gin htwet-lā-bā-myī (I) will come before long.

taing or taing-aung (more common than taing) as a preposition means 'till,' 'until,' 'up to,' 'as far as ' and has the same meanings as a conjunction. thu yauk-taing-aung ngā saung-ne-thi I waited till he came.

thaw-li: 'though,' 'although' thu hsin:-ye:-thaw-li: a-hlun-yo:-mat-thi though he is poor, he is very honest.

Interjections.

(L. §407-410). Some of the interjections are:

aw 'ah' (contentment-regret).

hpyit-ya-le-gyin: 'alas.'

a-me-le: 'oh mother' (pain, distress).

tha-du 'well done.'

o 'oh' (calling or addressing).

yaw 'here' (take it).

the 'you dare.'

he 'eh' somewhat disrespectful.

he 'here you' (implying reproof, addressed to inferiors).

Trackering)

he 'here you' (disdain).

Noun clause as subject or direct object.

- •• (L. §364-367 J. 122-123). Noun clauses are sentences in which the work of a noun is done by a sentence and they are found in English in the form of infinitives, gerunds, interrogative sentences, relative clauses beginning with 'what' or clauses beginning with the conjunctions that, whether or if (meaning whether). A noun clause may be used in English as the subject or the object of a verb, thus:
 - (i) Is it difficult to learn (or learning) Burmese?
 - (ii) It is very long since I met you.
 - (iii) What you say is true.
 - (iv) I knew that you came yesterday.

These sentences would be translated into Burmese as-follows:

- (i) Myā-mā-sā-gā: (a) thin-th I-hmā hket-thā-or (b) thin-yan or (c) thin-yue
- (a) lit. (they) learn Burmese is it difficult?
- In (b) the form used is that of the verbal noun formed with the gerundial affix yan,
- In (c) the verb with yue is equivalent to the English present participle.
 - (b) and (c) are the forms more usually used.
 - (ii) min-go mā-twe-thī*-hmā kyā-ha-byī. The 'it' at the beginning of the English sentences is not translated into Burmese as it is merely used to bring the verb before the logical subject and thus avoid infinitive or participial sentences which are frequently used in Burmese.
 - (I) did not meet you (or the not meeting you) has been very long.
 - It will be noticed that turning the sentence in this way renders the use of a negation necessary.
 - (iii) min -pyaw-thī-hmā hman-bā-thī lit. you say is true.
 - (iv) min: mā-ne-ga lā thi-go thi-bā-thi the whole sentence is in the accusative being the direct object of the verb thi.

^{*} Note.—The tense affix is not suppressed in noun clauses in the negative.

Noun clause in the possessive.

The most common construction in Burmese is to put into the possessive case all noun clauses in the accusative by using the word a-kyaung:* which means 'fact' 'circumstance,' thus the sentence given above.

I knew that you came yesterday would become in Burmese.

I knew the fact of you came yesterday.

min: ma-ne-ga lā-thl-i-a-kyaung:-go thi-bā-thl.

A sentence of this kind is however never used in Burmese in its full grammatical form and it is altered as follows:

(a) the possessive particle is suppressed and **thi** consequently takes the abrupt tone.

min : mā-ne-ga lā-thi-a-kyaung :-go thi-bā-thī.

(b) the sentence is further abbreviated by the suppression of **thi** and making **lā** and **kyaung**: into a compound noun.

min: mā-ne-ga lā-gyaung: thi-bā-thī.

The (a) construction is more used in the literary language whereas the (b) construction is more used in modern Burmese both in the written and the spoken language.

^{*}Note.—a-kyaung: (L. §523) is a verbal neun derived from the root kyaung: 'to draw a line,' and its primary meaning is therefore 'a drawn line or anything resembling a line' 'a long mark or streak,' with this meaning it forms compound nouns sa-gyaung: a line of writing, lan:-gyaung: 'path' 'road' ye-gyaung: 'channel.' From this primary meaning it has branched off to signify fact, circumstance, cause, reason, purpose, object, means, account. description, purport, event, subject, topic, what pertains to or concerns.

Noun clause with words spoken.

Noun clauses containing words spoken, thought or asked are simply noun clauses in the accusative, but they are dealt with separately as they sometimes take in Burmese a different construction from ordinary noun clauses.

Thus in the following sentences:-

- (v) he said that he came yesterday.
- (vi) he said that he would come to-morrow.

the ordinary construction with ko or a-kyaung: or kyaung: may be used:—

- (v) thū-ga mā-ne-ga lā-thi-go pyaw-bā-thī or thū-ga ma-ne-ga lā-gyaung:* pyaw-bā-thī
- (vi) thū-ga net-hpan lā-myi-go pyaw-bā-thī or thū-ga net-hpan lā-gyaung:* pyaw-bā-thī

The more ordinary construction is to repeat the words spoken in the original speaker's words and to place **hu** at the end of the words quoted.

hu comes from the verb hū 'to say' 'to declare,' and is the contracted form of hū-yue 'saying, declaring,' it corresponds in English to 'that' in indirect speech and to inverted commas in direct speech.

The sentences given above would therefore be transdelta into Burmese:

(v) he spoke saying 'I came yesterday'
thū-ga mā-ne-ga lā-thi-hu pyaw-bā-th

^{*} Note.—When the construction with a-kyaung: is used in sentences of this kind there is some ambiguity as the difference between past and future is not made unless an adverb of time is used.

(vi) he spoke saying 'I will come to-morrow' thū-ga net-hpan lā-myi-hu pyaw-bā-thī

hu is always expressed in the literary form and sometimes in the modern written language but is never used in speaking, when to takes it place.

hu is used with verbs of speaking, thinking and other verbs which imply speaking such as praising, demanding, questioning.

hu may also be used with other verbs which do not imply speaking; it then means 'saying to one's self' and may be translated by 'intending.' It is generally expressed in the literary language, but omitted in modern Burmese. tha-hko:-do-thi tha-hte:-go that-myi-hu la-gya-thi the thieves came intending (lit saying to themselves 'we will kill') to kill the merchant.

The tendency of Burmese in quoting the words of another person is to use direct instead of indirect speech as in English, thus 'the dog said that as he was his wife's master, he alone was entitled to have the pup' is in Burmese 'the dog spoke saying as (I) am the master and husband of my wife, (I) alone am entitled to have (it).'

This tendency to use direct speech makes Burmese quote words spoken where we merely indicate in English that words have been spoken, thus 'the magistrate sentenced the accused to three months' imprisonment' would be 'the magistrate sentenced the accused saying let him suffer three months' imprisonment' 'He refused to give me the pa-hso: would be 'he refused saying I will not give you the pa-hso:' 'The dacoits demanded Rs. 500' would be 'the dacoits demanded saying you must give Rs. 500.'

In sentences containing oblique or alternative questions the construction with hu or a-kyaung: is not used, thus the sentences

- (vii) I did not know where he would go.
- (viii) I did not know whether (or if he would come.

would become:

(vii) I did not know 'where will he go?'

thu bè-thwā :-myī-tè mā-thi-bā

- or thu be--thwa :-myi-go ma-thi-ba.
- (viii) I did not know 'will he come (or) will (he) not come?'

thu la-myi ma-la-myi-go ma-thi-ba.

Noun clauses with hpyit and shi.

Many subordinate clauses are turned into noun clauses by the use of the verbs hpyit or shi; thus instead of saying ngwe-go a-htū: a-thon:-lo-hā-yue, the words underlined are turned into a noun clause as the subject of the verb hpyit and the sentence becomes ngwe-go a-htū: a-thon:-lo-thi hpyit-pā-yue. This use of the verbs hpyit and shi is very idiomatic and it is unnecessary to translate them into English; the sentence given above would be translated, "because (I) particularly require the money," or if hpyit is translated "because it happens that (I) particularly, etc.

When the verb **shi** is used the tense affix **thi** is generally suppressed.

yua-hma mī:-laung-thī-hpyit-yue a-yat-ka-lū-mya:-ā:-lon: kon-hson:-bā-thī because a fire broke out (happened to break out) the people of the place lost all their goods.

because to-day is (happens to be) the 7th day of the waning.

thi-a-kyan-go hkim-bya:-laik-myi-hpyit-hlyinifyou should take up (happen to follow) this idea.

It will be noticed that the nominative affix hma is suppressed in all these sentences.

General Remarks on noun clauses.

The following rules may therefore be laid down for the translation of noun clauses into Burmese:

- I.—The sentence which forms the noun clause keeps the exact form it has as an independent sentence and the case affixes **hmā**, **ko** and **i** (suppressed) are merely added to it.
- II.—Noun clause as subject.—If the sentence contains an infinitive or a gerund, the verbal noun with yan or the participle with yue may be used instead of the sentence followed by hma.
- III.—Noun clause as direct object.—When the sentence is the direct object of a verb, i.e., when it is introduced by the conjunction that, two forms may be used.
 - (a) in noun clauses with words spoken the words spoken are quoted (generally in direct speech ie., as originally spoken) followed by hu (expressed or understood)
 - (b) in ordinary noun clauses the sentence is merely followed by ko.

IV.—Noun clause in the possessive.—The clauses mentioned above [III (a) (b)] are turned into noun clauses in the genitive by using, instead of the construction with hu or ko, the word a-kyaung: and pronouncing the verbal affix with the abrupt tone (on account of i suppressed). These sentences are further abbreviated and turned into compound nouns by shortening a-kyaung: to kyaung: and suppressing the tense affix.

Case Affixes.—It will be noticed that the nominative affix $hm\bar{a}$ is used in noun clauses instead of $t\hbar\bar{i}$ or ka.

ka (or ka-li: in the literary language) is generally used as the nominative affix with verbs of speaking, thinking, etc.

Tense Affixes.—In the present and past tense the affix. thi is used and in the future myi.

The affixes \bar{i} and $py\bar{i}$: $by\bar{i}$ or $py\bar{i}$ cannot be used in. noun clauses except in connection with hu.

The frequent use of noun clauses with ko or a-kyaung: is due to the fact that there is no conjunction in Burmese equivalent to the English 'that' and ko and a-kyaung: can therefore for practical purposes always be translated by 'that.'

Word order.—See p. 93.

Time.

Burmese Era. The sacred era dates from B.C. 543, when Gaudama is assumed to have attained Nirvana. The common era is said to have been established by King Thinga Raja and begins A.D. 639.

The word thek-ka-yit is often used before dates to mark the Burmese era (generally indicated in English by B.E.). This word is the Burmese rendering of the Palis sak-ka raja, the Sakka kings, the royal race to which. Gawdama belonged.

The year begins about the middle of April and is divided into twelve lunar months alternately of 29 and 30 days. The months of 29 days are called **yet-ma-son-la**, months of uneven days, and those of 30 days, **yet-son-la**, months of even days.

The year being lunar consists of 354 days, and to make it agree with the solar year, an additional month called du-ti-ya wā-zo (in Arakan tā-gu:-la-thit) is intercalated every third year.

The year is divided into three seasons called **u-du** (season) **ya-thi** (sign of the Zodiac) **kā-la** (time) or **a-hkā** (time.)

nwe:-u-du the hot season.

mo:-u-du the rainy season.

hsaung:-u-du the cold season.

Months. The names of the months are:

Tã-gữ:	April,	Tha-din:-gyut	October.
Ka-hson	May.	Ta-zaung-mon:	November.
Na-yon	June.	Na-daw	December.
W2-20	July.	Pyā-tho	January.
₩ā-gaung	August.	Ta-bo-dwe:	February.
Taw-tha-lin:	Sept.	Ta-baung:	March.

The first half of the month from the new moon a-thit to the full moon a-byi is called a-zan: the waxing of the moon. From the full moon to the change is called a-zok or a-byi-gyaw the waning of the moon. From the disappearing of the moon to the change is called a-gwe (the hiding of the moon.)

The day of the new moon, the 8th day of the waxing moon, the day of the full, and the 8th day of the waning

moon are set apart for the performance of religious duties and are called u-pok-ne or tha-din:-ne.

Days. The days of the week are:

Tă-nin:-gă-nwe-ne Sunday.
Tă-nin:-lā-ne Monday.
In-ga-ne Tuesday.
Bod-dă-hū:-ne Wednesday.
Kya-thā-pā-de:-ne Thursday.
Thauk-kyā-ne Friday.
Să-ne-ne Saturday.

There is no word for week in Burmese—week is expressed by hkun-hna-yet ta-bat, one circle of seven days, or by ta-bat alone—sometimes ta-tha-din one

religious duty, is used.

Note.—wā (Pali wā-tha rain) is the Buddhist Lent which lasts three months from the first day after the full moon of Wā-zo.

Wā-hso means to keep Lent.

Wā-gaung from wā and gaung top, summit—the height of Lent.

Tha-din:-gyut from tha-din: religious duty and kyut to come to an end—the month when religious duties come to an end.

Dates.

yet (a day of 24 hours) and ne (day between sunrise and sunset) are used together in dates.

The word ne-zwe: (=swe:-thaw-ne the day which has been fixed) is often used to mean 'date,' hkim-bya:-

pe:-laik-tha whse-yet-ne-zwe:-hnin sa-go ya-shi-ba-byī
(1) have received your letter, dated the 10th.

The numeral affixes used are:

pyi (full) with multiples of ten.

hku (no particular quality) with other numbers.

Cardinals and not ordinals are used.

Word order.—The order is the reverse of the English order—the year is placed first, then the month—then the day, thus:

thek-kā-yit htaung-hnā-ya-chauk-hsè-ngā:-gu-hnit pyā-tho-la-zok chauk-yet-ne on the oth waning of Pya-tho 1265 B. E.

htaung-shit-ya-ko:-ze-byi-hnit zun-la ko:-yet-ne on the 9th of June 1890.

Time of day.—The day is divided in Upper Burma into four parts: ta-chet-ti: one beat (of the drum)=9 o'clock, hna-chet-ti: two beats=12 o clock, thon:-gyet-ti: three beats=3 o'clock ie:-gyet-ti: four beats=6 o'clock.

In Lower Burma, English time is adopted and an hour is called na-yi (the Burmese ra-yi contains only 20 minutes); a.m. is expressed by ma-net and p.m. by nya-ne (evening) nya or nyin (night) or pyan.

9 a.m. would be ma-net ko :-na-yi-a-chein dwin.

9 p.m. nya ko :-na-yi-a-chein-dwin.

2 p m. na-yī-byən hna-na-yī a-chein-dwin.

In asking about time the old Burmese form is generally used be-hna-chet ti:-byi-le: what time has struck? ko:-gyet ti:-byi it has struck nine, instead of be-hna-na-yi-hpyit-tha-le, ko:-na-yi-ti:-byi. hto: is also used instead of ti: both ti: and hto: mean to strike (a drum or gong.)

The half hour is expressed by hkwo: (to divide length-wise, to split thon:-na-yi-gwe: half-past three.

[L. §87 (i and ii).] In speaking of time hmā or twin is used where we say 'at,' 'on' or 'in' and it is often omitted altogether. When adjectives meaning 'past,' last' are used with nouns of time the particle ka isfrequently employed instead of hmā or twin to express the idea of away from the present. thū sā-ne-ne-ga yauk-lā-thī he arrived last Saturday.

Idiomatic expressions for time.—There are many idiomatic ways of expressing time in Burmese, such as—

- kun: ta-ya-nyet-hkan about a chew of betel=about \frac{1}{4} \text{ hour.}
- hta-min:-o: ta-lon:-gyet the cooking of a pot of rice=about & hour.
- kyet-u:-dun the earliest cock crow=about 2 a.m.
- hsun:-gan-win time pongyis enter a town or villageto receive offerings of food=about 7-30 a.m.
- hsun:-gan-byan time pongyis return to their-monasteries after receiving offerings of food= about 8-30 a.m.
- htun-don: chut-chein time of unyoking bullocksfrom plough (U. B., = about 9 a.m.
- nyī-a-ko ma-thi-da-thi-a-chein time when brothers hardly know each other=dusk.
- thă-nge eik-hseik-chein children's bed time=about 6 p.m.
- **lu-byo-hie-pyan-gyein** time when young men return from courting=about 9 p m.
- lu-gyi-teik-chein time when the human foot is silent=about 10 p.m.

Compound Nouns.

The most simple compound nouns (L. $\S419$ —422) are formed:

(1) by adding one noun to another (the preposition hain 'and' being understood).

ba-mi mi-ba a-mi 'mother' + a-hpa father = parents.

tha:-tha-mi: son + daughter = children (with reference to their parents).

maung-hna-ma brother of a woman + sister of a man = brother and sister.

nyī-ā-ko, nyī younger brother of a man + ā-ko elderbrother of a man = brothers.

nyī-ā-ma, nyī-ma younger sister of a woman + ā-ma elder sister of a woman = sisters.

nyi-a-ko maung-hna-ma = brothers and sisters of a family.

a-hswe-hkim-bun: friend + husband or wife = intimate friend.

(2) by a noun preceded by a simple noun which defines it

ngwe-hpa-la: silver bowl, mo:-ye rain water, thitpin tree from thit wood + a-pin plant, kyun:-bin teak tree from kyun: teak and a-pin plant, tree.

hke:-dan pencil, from hke: lead + a-tan a slender stick (a-tan is only used in composition).

hmin-dan penholder from hmin ink + a-tan. hse:-dan pipe from hse: tobacco + a-tan. (3) by a noun preceded by a compound noun which defines it:

than-gyo:-za from than iron + kyo: rope + sa letter = telegram.

(4) by a noun followed by an adjective, and the compound thus formed having come to be used with some special meaning:

lu-gyī: elder (lu man + kyī: big).

tha-gyī: revenue collector (thu, man + kyī: big).

thu-ye: soldier (from ye: brave, bold).

tha-hte: merchant (from hte: rich).

tha-gaung: nobleman (from kaung: good).

thu-hsin :-ye : one of the people (fromhsin :-ye : poor)

lu-zo: bad character, vagrant (from hso: bad, wicked)

Other compound nouns are formed:

(a) by uniting two nouns of which the first is really in the genitive.

mī: fire, light + ein house = mī:-ein lamp, lantern.

mī: fire + yā-htā: carriage = mi:-yā-htā: locomotive.

yu \bar{a} village + th \bar{a} : offspring, inhabitant = yua-th \bar{a} : villager.

kyet fowl + *a-tha: flesh = kyet-tha: fowl flesh.

^{*}Note.—Where the second nouns begins with a, this a is elided in a compound noun.

(b) by uniting a noun with tha-ma: one skilled in, or a-the, trader, owner.

hse: medicine + thā-mā: one skilled in = hse: thā-mā: doctor.

mon cake, bread + a-the owner, proprietor = monthe cake seller.

hsī oil + a-thè owner, proprietor = hsi-thè oil seller.

(c) by using a relative clause and omitting the noun or pronoun which is its antecedent:

lan:-bya guide = lan: pya-thaw-thu he who shows the road.

 $s\bar{a}$ - $g\bar{a}$ -byan interpreter = $s\bar{a}$ - $g\bar{a}$: pyan-thaw-thu he who turns words.

myin:-dein: groom, syce = myin: htein:-thaw-thuhe who tends the horse.

pyin-nyā-yi wise man = pyin-nyā-shi-thaw-thū he in whom wisdom is = he who has wisdom.

a-ya-yi official (civil) = a-ya-shi-thaw-thu he in whom an appointment is = he who has an appointment.

a-hmu-dan official (military)=a-hmu-htan-thaw-thu he who does (carries on his shoulder) the work (of Government).

a-so-ya government = $a-so-ya-thaw-th\bar{u}$ he who has the authority.

bo-ba-baing ancestral land = a-hpo-a-hpa-paingthaw mye land which father and grandfather owned

a-ya-daw royal land = a-ya-daw hpyit-thaw-mye land which is royal property (thing).

(d) by using a relative clause and omitting the relative pronoun:

 $1\bar{a}$ -th \bar{u} comer = $1\bar{a}$ -thaw-th \bar{u} he who comes.

hko:- $th\bar{u}$ thief = **hko**:-thaw-th \bar{u} he who steals.

we-thu buyer = we-thaw-thu he who buys.

hko:-yā-ba-pyis-si: = hko:-ya-dwin pā-thaw pyissi: property included in the theft = stolen property.

shauk-win-ba-pyis-si: = shauk-hlwa-dwin pa-thaw pyis-si: property mentioned in the application.

(e) by using a relative clause and placing it after the noun or pronoun with the relative suppressed:

hse:-leik = leik-thaw hse: tobacco which (they have rolled) is rolled = cigar.

tha-hko: = hko:-thaw thu he who steals = thief.

ne-zwe: = swe:-thaw-ne the day (which they fix) is fixed = date.

htwet-yin: just coming out = a-yin:-htwet-thaw which originally comes out.

(f) by prefixing to a noun a verb with the force of a gerund.

ne-ein = dwelling house.

hlaw-laung: = paddling canoe.

hkat-tet = oar (oar to row with).

hlaw-det = paddle (oar to paddle with).

(g) by prefixing verbs to the nouns a-hmu, a-yā, sā-yā, a-hpwè, a-chein, a-chet, pon, a-han, and nī:

hko: to steal + (a)hmu business, case = theft case.

 $s\bar{a}$: to eat + (a)hmu business, case = eating business.

yaik to strike + (a)yā place = stroke, mark of blow. eik to sleep + (a)yā place = bed.

[J. $\S125$ (3).] $s\bar{a}$: to eat $+ s\bar{a}-y\bar{a}$ (from $a-ly\bar{a}$) what is for $s\bar{a}-z\bar{a}-y\bar{a}$ = food.

[J. §117 and 125 (4).] $s\bar{a}$: to eat + (a)hpwe what is fit for = $s\bar{a}$:-bwe food.

eik to sleep + a-chein time = eik-chein sleeping time.

pyaw to speak + a-chet subject, item = pyaw-gyet subject of talk.

si-yin to decide, order + a-chet subject, item = siyin-gyet judgment.

thwa: to go + pon form, mode = thwa:-bon mode of going.

hpan: to seize + (a) han appearance = way of seizing.
lok to do + ni: rule, way, manner = rule of working.
ye: to write + ni: rule, way, manner = method of writing.

(h) whole noun clauses may be used as compound nouns:

lok-ya-ban the times of having to do \equiv lok-ya- $th\bar{i}$ -i-a-hpan.

kā-za:-ban the times of playing = kā-zā:-thī-i-a-hpan.

kyan-sā-bā:-myā:-go pauk-ze:-a-taing: ya-lo-gyaung: shauk-htā:-bā-thī I beg to say that I wish to have the remaining paddy at current rates.

Note.—Although the verbs in these compounds become part of the compound noun, they do not lose their force as verbs and we find them with direct objects in the literary language, taking themselves the form of the plural.

kyun-ma-do-gā: hkā-yī:-thwā:-gya-thū-di: Weare indeed travellers.

mi-ba eik-kya-ya-hnaik hta:-thaw-pa-da-mya: the ruby which had been placed in the bed of the parents.

la-hpet-ko we-thu the buyers of tea.

(i) noun clauses in which a relative clause is followed by ne-yā place or a-yā thing (abbreviated to yā) and the relative pronoun is omitted, may also be used as compound nouns.

thim:-baw-tha-gyi: shi-ya-tho (= shi-thi-ne-ya) to the place where the ship captain was.

kyī: pyan-yā-th**o** (= **pyan-**th**i-ne-yā**) to the place where the crow flew.

hman-ya hpyit-pa-ya-myi (= hman-thi-a-ya) that a true thing may be = that justice may be done.

Synonymous compounds.

Burmans often use compound words when only one word would be used in English—generally these compounds are synonymous, one word being of Pali origin and the other Burmese:

nigon:-yuā-ni-gon Pali for village + yuā village = village.

a-myet-daw-tha from a-myet anger + daw-tha. Pali) anger.

Construction of the Burmese Sentence.

- (1) In a simple sentence the verb with its particles always comes last; the subject or object may or may not come first as the position of the other words of a sentence is determined by the emphasis placed on them, but
 - (a) interrogative pronouns and adverbs immediately precede the verb;
 - (b) the relative clause always precedes the noun or pronoun which is its antecedent in English.
- (2) The compound sentence is not much used in writing as the Burmese prefer the use of subordinate clauses. A sentence such as 'he came and spoke' would be 'having come, he spoke' or 'after he had come, he spoke.' 'He was thirsty and drank much' would be 'being thirsty he drank much' or 'because he was thirsty, he drank much.'
- (3) The complex sentence.—The Burmese style is much more connected than the English narrative. Short abrupt sentences are not used as in English, but every sentence is connected with something that goes before and long involved periods are often found in Burmese writings. In a complex sentence the subordinate clauses must be placed first and the principal clause always comes last.

When the same word is the subject of the principal clause and of the subordinate clauses, it is used in one clause only and omitted in the others.

Noun clauses.—The noun clause construction is one of the most common in Burmese and it has been dealt with separately (see).

Noun clause with words spoken.—In noun clauses with words spoken the subject of the principal verb is generally placed first—then the words spoken, thought or

asked (as originally spoken) followed or not by hu and finally the principal verb—thus 'he said that he would come' would be in Burmese 'he, I will come, said' thu-ga ngā lā-myi (hu) pyaw-thī.

Sometimes the indirect object of the principal verb is placed first instead of the subject and a subordinate clause may follow the subject before the words spoken.

The nominative affix ka is generally used with verbs of speaking and thinking.

Broken construction.—In a long sentence the writer often begins with one construction, which he forgets in the course of an involved period and he ends by a different construction.

Other remarks.—A construction peculiar to Burmese is to use a transitive and an intransitive verb together with different subjects understood—thus po-yauk (they) sent (him) (and he) arrived, ya-shi (he) got (it and it) was in his possession, po:-kan: ya-yūthon:-zwo: (she) gave (I) got (and) used (it).

Burmese Correspondence.

In Burmese correspondence letters do not begin with polite formulas such as 'Sir,' Dear Sir,' 'Dear Mr.' or end with 'kind regards or remembrances,' 'hoping you are well' and 'your obedient servant' yours faithfully—truly—sincerely.' There are, however, well defined ways of expressing the gradation of intimacy or esteem which these formulas imply.

The writer almost always writes of himself in the third person by his name or some title or both and also addresses the person written to in the third person in the same manner. Thus a paddy trader writing to a broker will write;

Paddy trader Maung Htan Myat begs to inform Maung Shwe Hkin, head broker of the wonderful mill, Hka-naungto, Rangoon.

This form of address does not imply any suggestion of formality or hauteur which it often has in English, but is used out of politeness and consideration for the feelings of the person addressed, as pronouns in Burmese mark rank so sharply that their use is avoided.

The relative estimation in which the writer holds himself and the person addressed is indicated by the use of terms of relationship and by the verbs used at the beginning of the letter. Thus a younger person or one inferior in rank is addressed as 'younger brother or sister' whereas a superior or an older person is addressed as 'elder brother or sister,' 'uncle or aunt,' 'founder of a za-yat monastery or pagoda' and the word 'hkim-byā:' sir or madam added.

The verbs used for the same purpose are:

hmā-laik-pā-thī

kyā:-laik-pā-thī to intimate to inferiors.

kyā:-hmā-laik-pā-thī

kyā:-yauk-!aik-pā-thī, to inform equals.

a-si-yin-hkan-ba-thī, to report to (or address) superiors.

Note — hmā or kyā: or kyā:-hmā means 'to inform' a-si-yin-hkan means 'to submit for orders,' 'to beg for orders.'

Pongyis in addressing laymen use the words 'myitta-yat-hkan-ba-thī.'

The formulas equivalent to our 'kind regards' and hoping you are well' are placed at the beginning of the

letter, thus 'all my children are in good health and happy 'on account of the good wishes which my younger brother has sent, in the same manner (I) am sending good 'wishes and praying that (my) younger brother with all his 'family and relations may be in good health.'

"We are in good health and happy without any trou"bles or anxieties on account of the good wishes which the
"head broker and his family have sent (us). We also in the
"same manner are praying that the head broker, all the members big and small of (his) household, (his) children, (his)
relatives and connexions may be free from all trouble and
all kinds of unpleasant conditions, that none of the 96 diseases may befall (them) even to the extent of a single
atom and that (they) may be all in good health and happy."

"We are in good health and happy on account of the good wishes which the head broker and his family have sent us. In like manner we send (them) every day our good wishes as if (we) were pouring out some water of libation so that (they) may be well and happy."

The following translations will give some idea of the style of a Burmese letter:

Ko Than writes (this) letter, Head Clerk Ko On Dan.

If Maung Hpo Nyan and Maung San Hpe come to receive the money when the paddy has been measured, before Ko Than comes, please pay.

Maung Than.

Broker Ko Hpo Hta writes and send this letter.

The facts are as follows: having settled up the brokerage on 3,109 baskets of paddy which is due as brokerage for two weeks, please give (it) to the wife of Maung Kyā U, Ma Sein Nyun, who comes with this letter. It happens that (he) has sent Maung Kyā U to the paddy plains.

Head Cashier at the upper mill of Messrs. Steel Brothers having settled up, please give (the money).

Ko Hpo Htū, living in Pyon-gyo quarter.

The elder brother writes to Maung Aung Ban.

The elder brother and his family are well. He is praying daily that (his) younger brother and family may be well. (He) has received a letter from U San Gyaung.

(He) has learnt that (his) younger brother's father is dead as (it) is mentioned in that letter. (He) writes to inform that the price of good pure oil at Dedayè is from Rs. 74 to Rs. 75. Younger brother Maung Aung Ban.

Maung Hpo: Hket, Dedayè.

It will be noticed that all these letters are written in the third person, and in the last the writer is probably no relation of the person he writes to; he is most likely an older man writing to a younger one and therefore calling him 'younger brother.' If they had actually been brothers, the reference to the death of the father would have been differently worded and probably more sympathetic.

It will also be noticed that all these letters are signed, though this would not appear necessary when using the third person. It was not the Burmese custom to sign letters or other documents, and the signature is no doubt an innovation due to English custom.

The style used in correspondence resembles the spoken language more than the literary form and short sentences are generally used instead of the long involved periods.

Idiomatic use of Burmese words.

It has already been noticed that Burmese verbs have often an active and a passive meaning and sometimes opposite meanings—other Burmese words have also opposite meanings:

she future or past.
nauk future or past.
hnin with or from.
a-su total or portion, share.
kye:-zū: benefit or gratitude.

APPENDIX I.-INTERROGATIVE

PART III.

Literary Language.

The lietrary language is used in religious writings, histories, newspaper leaders and school books. It is seldom used in speaking except in translations from Pali; but it was the language of formal conversation at the Mandalay court and is still heard in dramatic performances.

It differs from the modern form of the language less in the words used than in its particles and affixes, but it differs widely from colloquial both in the words used and in its particles and affixes.

The principal points in which the two forms of the sanguage differ are given in the following notes.

Declension.

Nom. thi or ka or hma or ka: or thaw-ga: or mu-ga: sometimes mu alone.

Gen. i (or shortening of vowel).

Dat, a: or a-lo-hnga

Acc. ko

Nominative. (J. §60 L. §91) thī, is the ordinary affix of the subject, but li: 'also' is often used in its place. ka which often has li: 'also' added to it is used with verbs of saying, telling, thinking, considering, etc.

hmā is emphatic and generally has the meaning of 'as to' 'as for' 'concerning' 'in regard to' it is often used to call attention to that about which one is going to speak and then means 'as follows' nga-hmā-pyan-

thwa:-ya-myī (as for me) I shall have to return. It is sometimes joined to mū to render it more emphatic thū-do-hma-mū a-sun:-that-ti ma-shi as for them they have no ability.

(J. §60-61) kā: is used as the subject affix in nouncelauses,

It is also used:

- (a) in contradistinction or contrast **ī-ein-gā: kaung:-i** hto-ein-gā: mā-kaung: this house is good, that house is not good.
- (b) in an explanatory sense with the same meanings as hmā a-kyun-nok-kā: ye-go-thā thauk-myī (as for me) I will drink only water.

kā: is much used in combination with mū hmā and thaw as mū-gā:, hmā-gā: and thaw-gā: It is used after other case particles in its emphatic and contradistinctive sense; kyun-nok-ko-gā: thū a-lun mon:-i (in regard to myself) he hates me very much; hto-ne-hnaik-kā: mo:-mā-yuā on that (particular) day it did not rain.

Sometimes mu alone is used in the same sense as ka:

Genitive. (L. §92 and 193 (2). J. §64-78). The particle i is often omitted and the noun standing in the genitive is pronounced with the checked tone, or if it ends in a or u the vowel is shortened thu-hkwe: nga-a-hpe

Dative. (J. §65. L. §93). hnga means 'for' but it is only used in combination wih a-lo 'wish' 'desire' to give the notion of 'end' 'purpose' 'motive' and this combination is affixed to a noun thit-thi:-a-lo-hnga for the purpose of (getting) fruit si-bwa-a-lo-hnga for the sake of benefit.

Accusative. (J. §62-63. L §94).

The particle ko is sometimes omitted thu-ye-thauk-

ko is sometimes used in the same manner as hma meaning 'as to.'

Personal Pronouns,

thin is the pronoun generally used for the second person.

a-kyun-nok is more used than kyun-daw or kyun-daw-myo:

Interrogative Pronouns and Adverbs.

(L. §137-42. J. §82-83 and 87-88). The interrogal tive pronouns are formed from a-be and a-tī (obsolete which are adjectives meaning 'what' 'which.'

		-	
a-be	•••	•••	What? which? (adjective).
a-be(a-ya)go		•••	What thing? What?
a-be(ne-ya)go			Towards what place? Whither?
a-be(a-kyaung)-gy	aung		On account of what reason? Why?
a-be(ne-ya)hnaik	or dwin	or	In what place? Where?
a-be(ne-yā)hma or	ga		From what place? Whence?
a-be-thu(a-thu)			What person? Who?
a-be-thaw-a-hkā	•••		At what time? When?
a-be-hmya		•••	How much?
be-hna (with numer	ical affix)	•••	How many?
a-be(ni:)-tho '(a-th	o) or	}	Towards what manner? How?
a-be-ge-tho	**		Towards water mannor How

'ni:, manner, method.

Indefinite Pronouns and Adverbs.

(L. §146—150—228—230—234—235. J. §82). The interrogative pronouns a-be and myi-thi are also used

as indefinite pronouns and in negative sentences express the English 'none, no one, none whatever.' They are usually used with the adverb hmya and sometimes with mā-hso and both these words add to the indefinite meaning of the pronouns thū-thī a-be-kyaung-go (or go-hmya) mā-thwā: (lit. he goes not to whatever school or so much as to whatever school) he does not go to any school. The indefinite adjectives tā-zon-tā-hku, tā-zon-tā-yauk, etc. are often used with a-bè and myi-thi to give greater emphasis.

a-kyin is also an indefinite pronoun and means 'whatever, whatsoever, any.' It is generally used in connection with the demonstrative hto, a-kyin-thū-thī yan-thū-let-ka lut-le-byī:-hma hto-thū-thī a-thet-shin-thī he who has escaped from the hands of his enemy, recovers his life.

	In negative sen- tences.	In affirmative sen- tences.
a-be-hmya	nothing whatever, nothing at all.	-
a-be-ma-hso	*****	anything whatever
a-be-go-hmya	nowhere (with mo-	= 7
a-be-go-ma-hso	*****	anywhere or wher ever (with motion
a-be-gyaung-hmya	for no reason what-	
a-be-gyaung-ma- hso	*****	for any reason what ever.
a-be-hmā-hmya	nowhere (without motion).	1 - 1
a-be-hmā-ma-hso	*****	anywhere or where
a-be-thū-hmya	no one whatever, no one at all.	tion).
a-be-thu-ma-hso &c	•••••	anyone whatever or whoever.

Relative pronouns.

(L. §368-369 J. §115 and 125 (2)).

The relative pronouns are:

- (a) thaw
- (b) ya
- (c) thi (shortened to this) followed by the adverbyue or hmya and corresponding to the English 'whatever' shi-this-hmya-thaw myin:-mya: the-this as many horses as there were died.

Adjectives.

(L. §105. J. §80.) Adjectives of quality, quantity and pronominal adjectives are connected with the noun they qualify by means of the connective particle thaw as kaung:-thaw-lū (a) good man, hla-thaw-pan: (a) pretty flower.

Adjectives of this class may also be post-fixed to a noun, no connective is then required and the two form a kind of compound noun as lū-gaung: good man.

Possessive Adjectives.

There are no possessive adjectives in Burmese and their place is taken by personal pronouns in the genitive—my book, kyun-nok-i-sā-ok; his pony, thū-i-myin:

Demonstrative Adjectives.

(L. §127 J. §82). The demonstrative adjectives are prefixed to nouns; they are:

or yin: (obsolete) this or these hto that or those

la-gaung:, is the abbreviation of ti:-gaung: 'and also.'
It means 'the same' or 'that same' la-gaung-lu-do-thi
'the,' 'those' 'or these men.'

Indefinite Adjectives.

(L. §122. J. §84-85-86). In addition to the indefinite adjectives already mentioned (p. 19) the following are more especially used:

tă-gā 'many,' 'all' is always affixed to nouns thū-tā-ga-go mā-pyaw-hnin 'do not tel! all persons.'

hkat-thein: 'all' is either prefixed or affixed to the noun it qualifies.

tā-bā: 'other' 'another' or tā-htū: (same meaning but only applied to persons) may be prefixed with or without thaw to the noun they qualify; thū tā-htu (or thū-tāba)-go mā-pyaw-hnin do not tell another person.

a-chā: 'other' a-cho 'some' a-lon: 'all' ni: 'few' myā: 'many' are generally prefixed to the nouns they qualify with the connective thaw.

Indefinite Adjectives (L. §123. J. §101).

The indefinite adjectives ta-hku-gu, etc., are prefixed with thaw to the nouns they qualify.

Numeral Affixes (L. §109—111. J. §96—98).

l. (L. §77). When the number does not exceed ro numerals with their numeral affixes generally precede the nouns they qualify and are joined to them by the connective thaw, thon:-yauk-thaw pon-nā:-do-gā: the three Brahmins. The plural affix may be added to nouns with a numeral affix, but it is generally omitted.

hna-yauk-thaw lu-do-thi or hna-yauk-thaw-lu two men.

II. When the number is an exact multiple of 10 the numeral affix is prefixed to the numeral with a before it.

myin: a-kaung-hna-hse twenty ponies.

nwa: a-kaung-thon:-ze thirty oxen.

III. When the number exceeds 10 and is not an exact multiple of it, the numeral affix preceded by **a** is prefixed to the numeral (as in II) but is again repeated after the number with **a** dropped.

myin: a-kaung-hnā-hsè-ngā:-gaung twenty-five ponies.

nwa: a-kaung-hse-le:-gaung fourteen oxen.

Verbs.

The tense affixes are:

Present and past i or thi or tha-di:
Future an or myi or leim-myi. Sometimes an and myi are used together.
Perfect (in have) or Pluperfect pyi:-byi or pyi

Future.

(L. §327-328). leim, (le, euphonic particle + an) teim-an (implying eventuality) la-tan (lat, euphonic particle + an) and gyeim (che p. 53 + an) are also used as future affixes.

peim and seim (being compounds of pe, euphonic particle and se, to cause, with an) are seldom used in prose; seim, however, is used to form a future infinitive.

Imperative.

(L. §297-301, J. §111-112). The imperative is formed by using the verbal root alone or the verbal root with law instead of taw

Such forms as thwa:-gya-an or thwa:-gya-gon-an (we) will go, are employed to mean 'let us go' but they are not true instances of the imperative and merely serve as substitutes for it.

se or pā-ze (J. §113) when prefixed to thaw and following a verbal root expresses a wish thin kaung:-sā: bā-ze-thaw may you be prosperous! thin a-thet-sha-bā-ze-thaw may your life be long!

Infinitive.

- [L. §286-310-312 J. §123 and 125 (2 and 3)]. There is no infinitive proper in Burmese but there is an infinitive of purpose or gerund which is formed by:
- (1) adding hngā to a verbal noun* (hngā meaning: for') thū-thī kyi-shu-gyin:-hngā lā-thī he came to look.
- (2) adding a-lo-hngā to a verbal noun (a-lo want, desire). thū-thī yan-gon-myo-tho kon-we-gyin:-a-lo-hngā lā-thī he came to Rangoon to buy goods.
- (3) adding thaw-hnga to a verb in the future tense with an sa:-an-thaw-hnga in order to eat.
- (4) adding hngā or thaw-hngā to a verb in the causative future tense expressed by seim lā-zeim-thaw-hngā to make him come.
- (5) End or purpose is sometimes expressed by a verb in the tuture tense with hu expressed or omitted: hko:-thū ngā:-yā-do-thī thā-hte-tha-go that-yue let-sut-ko hko:-yū-myi-hu lā-gya-i Five hundred thieves came (lit. saying to themselves we will kill and take) intending to kill the merchant's son and take the ring.

tha-mi:-do-thi hsan-shaw-gya-myi-hu-la-lat-kon-k the daughters came intending to wash their hair.

Plural of verbs.

The affix kon is more used than; kya or kya-gon.

Interrogation.

(L. §440. J. §110). All interrogative sentences terminate in interrogative affixes which are placed after the temporal affixes. The temporal affix thi when followed by an interrogative affix is often shortened to this

^{*}A verbal noun is formed by prefixing a or affixing chet or chin: to a verb—pyu 'to do' becomes a-pyu or pyu-gyin: or pyu-gyet 'deed,' 'action.'

In questions to which the answer is simply 'yes' or 'no' the affix law is used.

In questions to which the answers is not simply 'yes' or 'no' (i.e. when a-be or myī-thi is used in the question) the interrogative affix ni: must be used.

Negation.

(L. §341—355. J. §120). The negation is expressed in the literary language in the same way as in the modern language except in the imperative where mā.....lin is often used instead of mā-hnin

Verbal Affixes.

- (L. §357. J. §118). The verbal affixes used in the literary language in addition to those already given (p. 50) are:
- ti (J. §117) 'directly,' 'straightway,' 'without delay.'
 thu pyaw-ti-thī he spoke directly.
 - ti: (J. §118) has various meanings:
- (a) as a closing affix it is generally preceded by the shortened form of thi and is used in imprecations and blessings thin-do-ā: kaung:-gyo:-min-ga-lā-a-paung-hnin pyi-zon-gya-ze-thā-di: may you be replete with all blessings.
- (b) as a closing positive affix it is used instead of another verb generally **hpyit-thī** ngā min:-dl: I am the king.
- no:, no:-no:, sā-no: [J. §125 (4)] implies probability or means 'to have a presentiment' the-sā-no:-no:-hnin having a presentiment of death. thū-thī net-hpan mo:-yuā-no:-no: htīn-thī he thinks that it will probably rain to-morrow.

When it is affixed to each of two verbs it gives the idea that the two actions are going on alternately thū-thī yī-don ngo-don ne-thī he stays laughing and crying by turns.

le indicates a natural sequence of events without reference to any particular time thū-do htwet-thwā:-gya-le-thī they departed lun-le-byī:-thaw a-hkā-hnaik at a time that has gone by.

Emphatic Affixes.

(L. §358. J. §117—119). The following affixes are merely used for the purpose of adding emphasis:

nyā: is used with the conjunction thaw-li: to express emphatic concession lon-la-pyu-yue thā-mo-dā-ya-dwin the-nyā:-thaw-li: myat-thī-thā-tā-gā: if a man show energy although he should die on the sea, he alone is indeed noble.

taung: are used at the end of a sentence and may be translated by 'indeed,'

an-bwe-tha-ye shi-zwa-ta-ga: how wonderful indeed!

pe and hpi are placed after the verb a-be-gyaung thwā:-bi-thā-ni: why did you go, thin pyaw-thl-sā-gā: hman-be-thī what you say is indeed true.

le is used with a persistive force thu thwa:-thī-le (I tell you) he did go. In colloquial speech this affix is largely used with the imperative to avoid rudeness thi-go la-le come here (do). When combined with pa it has a precative force sa:-gya-ba-le do eat.

hlyin 'indeed' a-di-hma-hlyin where indeed?

Adverbs.

(L. §451. J. §126). Simple adverbs are generally formed from adjectives or verbs by

affixing swa to adjectives kaung : zwa well.

Compound adverbs are formed by joining different words and particles. Some of the more common are:

I-tho thus (I-ni:-tho lit. towards this manner). hto-tho

ī-ge-tho thus (i-ni:-ge-tho lit. like this manner). hto-ge-tho

i-pyin (outside this)

la-gaung-pyin (outside the said)

i-hma-ta-ba: (apart from this)

i-gyaung because of this hto-gyaung because of that tho-hpyit-yue such being the case tho-hpyit-thaw-gyaung such being the case

fore.

ī-ni :-a-tū in like manner. ī-ni :-dū

Prepositions.

hnaik or we (almost obsolete) is more used than twin or hma and is sometimes used with same meaning as a: 'to 'ka 'from ' or ko (direct object).

Norg .- An adverb formed in swa may be reconverted into an adjective with intensified force by affixing the connective thaw, myat-swā-thaw-hpa-ya: most excellent god we:zwa-thaw-a-yat a very distant place.

tho is generally used to mean 'to' (with motion) instead of ko

hpyin or a:-pyin' by means of' is more used than hnin

hma 'from' is more used than ka

Conjunctions.

thaw 'if' or 'when' sometimes 'as' (thaw being often preceded by the euphonic affix lat).

mū, mū-gā:, tā-mū-gā: tā-byi-gā: thaw-ga: 'if' or 'as.'

kā denotes contemporaneous action and is equivalent to the English present participle.

lyet has the same meaning ka

[J. §126 (7)] la-gaung: (also) when repeated means both and thu-la-gaung: nga-la-gaung: thwa:-myi both he and I wil! go.

thaw-ii: or thaw-ia-gaung: repeated means 'either or' or 'whether or.'

hpyan-thī ngā: ya-thāw-lā-gaung: mye-gwe:-thī thā-min ya-thāw-lā-gaung: ngā yā-hku we-pe:-thā-gè-tho we-yue sā:-gya-gon whether the otter catches fish or the fox catches game, divide (it) and eat (it) as I now divide it for you.

ma ka not only but.

Noun Clauses.

Noun clauses are formed in the same manner as in the modern language (see pp. 75—82), the only differences being that

ka: is used as the subject affix instead of hma

ka-lī: is generally used instead of ka with verbs of speaking, thinking, etc.

hū-yue or its abbreviated form hu is always used with words spoken.

hu is also generally expressed with verbs which do not imply speaking to mean 'intending' (see p. 113).

Pali words.

Pāli is the religious language of Buddhists; it is taught in every village school in Burma and is used by women and children in saying their prayers and telling their beads. Many Pāli words conveying religious or abstract ideas have consequently been introduced into Burmese literature and are also used in every day conversation; some of these words have retained their original form while others have assumed a Burmese garb.

Pāli words are often used as synonyms to Burmese words to give elegance to the style as in the following expressions:

ဥပါယ်တမျည် u-pê-tă-myi expedient, device.

\$ດໍ: ຄວ ni-gon-yua village.

ကောင်း ရှိုးသာရ kaung:-gyī: thã-du well done.

ျွိုးမွှပ်းထောမနာ chī:-mun: taw-mā-nā to praise.

ဘေးအန္တရာယ် be:-an-da-ye or အန္တရာယ်ဥပဒိ an-da-ye u-pat evil, calamity.

အမျက်ဒေါသ a-myet daw-tha anger.

The following are some of the Pāli words in most common use in Burmese:—

အင်္ဂါ in-gā limb, member.

အထူးျပည္ထိ a-top-pat-ti circumstances, events.

නාවයු a-dā-ma (න a privative and වනු dā-ma law) violent injury (adv.) in a violent, forcible manner (නාගරි:නාවෙනු a-tin a-dā-ma)

30890 a-deib-be meaning—explanation—comment.

အန္က a-neg-ga immeasurable (အတိုင်းမရှိသော၊ a-taing: mä-shi-thaw)

အည္တရာလ် an-da-ye calamity, evil (ဥပဒိ u-pat)

အပါလ် a-pe (လေးပါး le:-ba) a state of punishment of which there are four: ငရဲတို ngā-ye-bon တီရီစွာသိုတို၊ tā-yeis-san-bon ပြည္သာဘို၊ peit-ta-bon အသူရကယ်ဘို။ a-thu-yā-ke-bon

of the common laws of transmigratory existence and will attain annihilation (\$35 neib-ban) at the close of the present life. The ariya has overcome as an enemy all evil desire (800001 ki-le-thā)

အလင္ဇိ a-liz-zī (အ a privative and လင္ဇိ liz-zī shame) without shame, abusive, foul (language) အလင္ဇိ သဲဆိုသည် a-liz-zī hse-hso-thī to revile in abusive foul language.

30000 a-tha-ye character, reputation.

ദ്മാനാ ā-nā authority, power, order.

3000 ā-ma yes, assent, acquiescence, agreement.

3ວາດວໍ້ ā-ma-hkan to engage for, to undertake, take responsibility, to stand security, (0 ຊີວໍ wun-hkan-ວວາກັກ hkan-wun)

အာဂရုံ an object of actual sense or thought.

pop u-du season.

ဥပဒေ u-pa-de rule, code (နည်း။ ni:)

The cardinal virtues.

ဗြဟ္မစိရီတ ျားခလးပါး byă-mă-so tă-yā:-le:-bā.

(၁) မေတ္တာ။ myit-tā ချစ်ခြင်း chit-chin benevolence.

(၂) ကရုဏာ gă-yu-nā သနားခြင်း thā-na:-gyin:

pity, compassion.

(၄) မုဒိတ္သေ။ mo-dei-tā ဝန်းမြောက်ခြင်း wun:myauk-chin: joy in the happiness of others.

(၃) ဥပေက္သား u-pek-hkā လျစ်လျူရှသည် lyit-

lyu-shu-thi indifference or equanimity.

The three characteristics of life which are subjects for reflection when saying the chaplet (လက္ခဏာ) ရေးသုံးပါး။)

အနိမ်ျ a-neis-sa အမြဲမရှိခြင်း a-myè:-mä-shi-gyin :

transitoriness.

ဒုက္ခ္မ္း dok-hka ဆင်းရဲခြင်. hsln:-yè;-gyin : misery.

အနတ္ကူ a-nat-ta အနှစ်မရှိခြင်း a-hnit-mā-shi-gyin: unsubstantiality.

PART IV.

Colloquial Language.

BURMESE is altered and simplified as it passes from the literary to the modern form. The colloquial form of familiar conversation is still further simplified and softened down. Many of the words used change completely, others are abbreviated and corrupted, phonetic changes are carried to their extreme limits and phonetic spelling is largely adopted.

The principal points in which the two forms of the language differ are given in the following notes.

Declension.

Nom, ka or ha or ka-daw

Gen. shortening of vowel.

Dat. ko

Acc. ko

Nominative. ha, a corruption of hma is often used as a nominative affix a-hpo:-gyī:-ha kyan:-gyan: ma-ma-be: shi-the:-do the old man is still very hale and hearty.

kā-daw corresponds the literary thaw-gā: or mū-gā: and is used in the same way in contradistinction and contrast.

Plural of nouns. The plural affixes mya: and to are often used together L. §74.

The plural of nouns is also formed by using two lu-

Plural pronouns.

do is used for kyun-nok-to or ngā-do thus do-yua our village,

Reflexive pronouns.

chin: (a-chin:-gyin: one another, mutually) is frequently used in colloquial a-pyaw:-gyin:-be: im-ma-tan kwā-de even (their) respective ways of speaking are very different. (Stevenson's Dictionary, page 301).

INTERROGATIVE PRONOUNS AND ADVERBS.

The interrogative pronouns and adverbs are formed from the interrogative adjective be (the literary form abe with the a suppressed) which means 'what' 'which' by adding some noun to it either expressed or understood.

(1)	What? Which? (adjective)	bè
(2)	What thing? What?	bā¹
(3)	Towards what place? Whither?	bè
(4)	On account of what reason? Why?	ba-gyaung or bā-pyu-lo¹ or bā-hpyit-lo³ bè-gyaung bè-gyaung
(5)	In what place? Where?	be-hmā or be-mā·
(6)	From what place? Whence?	b è -ga
(7)	Which? (of more than one thing)	bè-din : ⁵
(8)	What person? Who?	be-thū or bā-dū or bā-lū
(9)	At what time? When?	bè-daw-ga or bè-daw bè-don :-ga'
(10)	How much?	be-lauk or ba-lauk
(11)	How many?	be-hna (with numeral affix)
(12)	Towards what manner?	bè-nè or bè-lo
(13)	How? What kind of?	bèmyo :

'bā is a contraction of bè + hā (hā being the contraction of a-yā, thing); the form ba-hā is sometimes found, but it is nearly obsolete. 210, colloquial for yue lit. having done what? 2 lit. what having happened? 'mā, colloquial corruption of hmā. din: = thin:, this or that (thing). bā-dū, colloquial corruption of bè-thū by suppressing è and softening th to d; bā-iū or bā+lū 'man' bè-daw daw is a corruption of thaw, and ton: denotes a progressive action as thwā:-don: 'going' nò is the colloquial pronunciation of ni: 2 lo is the colloquial form of gè-tho.

INDEFINITE PRONOUNS AND ADVERBS.

The interrogative pronouns and adverbs are also used as indefinite pronouns and adverbs—and the adverb hmya (corrupted to hma in colloquial and sometimes in the written language) is usually added to them or the verb ma-hso (yua) which means 'not saying.' be ... ma-hso, signifies 'not saying whatever 'person, animal, or thing) in particular.' 'anything whatsoever.'

In negative sen- tences.	In affirmative sen- tences.2
nothing whatever,	anything whatever
nowhere (with motion)	anywhere or wherever (with motion)
for no reason what-	(
)	for any reason what- ever
nowhere (without motion)	anywhere or wher-
no one whatever, no one at all	ever (without mo- tion) anyone whatever or whoever
	nothing whatever, nothing at all nowhere (with motion) for no reason whatever nowhere (without motion) no one whatever,

'hpyit-hpyit (let it be), or the verb reduplicated, is often used instead of the forms in mā-hso. Thus bā-dū-hpyit-hpyit twe, or bā-du-go-twe-twe, whomever you meet; be-go thwā:-thwā:, wherever you go; be-lo lok-lok, however you do (it).

'The forms in hma can only be used in negative sentences, whereas the forms ending in mā-hso or with the verb re-duplicated can be used both in affirmative and negative sentences. The adverb hma is always placed immediately after the case affix

Relative pronoun.

The relative pronoun most generally used is to a corruption of thi

Adjectives.

When the adjective precedes its noun, the connective used is the relative pronoun to

(J. §93 L. §174.) Adjectives are often used in the way shown below to denote the presence of a quality or quantity in a small degree.

(a) by prefixing the adverb hkat 'somewhat' to an adjectival root reduplicated hkat-cho-gyo 'somewhat sweet' 'sweetish' hkat-hso:-zo: 'somewhat wicked.'

(b) by affixing ta-ta to adjectives denoting quality. This particle has the same meaning as hkat but it assimilates its vowel to that of the adjective to which it is joined.

nī + ta-ta = nī-tī-tī reddish

hpyū + ta-ta = hpyū-tū-tū whitish.

sein: + ta-ta = sein:-tein:-tein: greenish.

me:-ta-ta = me-te:-te: blackish

mū: tū: tū: a little sick.

kaung: taung:-taung: rather good.

(c) by reduplicating an adjective of quantity and pronouncing it with the checked tone as cho-gyo sweetish from cho sweet, hka-ga bitterish from hkā:

Demonstrative Adjectives.

These adjectives are prefixed to nouns and are:

dī (corruption of thī) this or these; dī may be shortened to dā, dā-lo thus

ho that or those.

Numeral Affixes.

Numbers. tā-boit-thā 'one viss' is often used instead of 100 when speaking of rupees, as the rupee weighs one tical and there are 100 ticals in a viss (3.65 lb.) thus.

hnā-peit-tha-ngā:-zè two viss 50 ticals = Rs. 250. tā-beit-tha-ko:-zè one viss 90 ticals = Rs. 190.

tā-beit-tha-19:-zè-chauk-kyat-hkwè: one viss 146} ticals = Rs. 146-8 o.

Verbs.

The tense affixes are:

Past and present. tè or dè (corruption of thi) or yè or kè (corruption of i) nā:-lè-bā-yè or nā:-lè-bā-dè (l) understand, hok-kè-lā: is it true?

tā or htā (or dā when preceded by a vowel or a nasal) is a corruption of the tense affix thī and hā 'thing' and is used as a tense affix especially in noun clauses, thū-do-ā:-lon: dā-lo pyaw:-gya-dā-bē: they all say so. mā-twe-dā kyā-hla-bī it is long since I met (you).

Future. me (colloquial pronunciation of myī) ein-go thwā:-daw-me (l) am going home now.

Perfect (in have) or pluperfect. pī:-bī or pī || mo:-teik-pī (it) has stopped raining.

In interrogative sentences before lā: or lo: or ton: all the tense affixes are shortened as thī is shortened in the written language.

mè becomes mã and pī becomes pã thus.
nā:-lè-thā-lā: or nā:-lè-yè-lā: do you understand?
bè-thwā:-mã-lè: where are you going?
mã-net-sā sā:-pī:-bā-lā: have you breakfasted?

Imperative. law is changed to taw in giving a direct command L. §249.

tan-daw (make sufficient) stop.

laik is most commonly used in peremptory orders L. \$299.

dī-pā-gan-byā: lè:-laik change this plate.

so is used in the first person plural instead of the verb with 2 L. §299.

hle-ne thwa :-gya-zo let us go by boat.

Infinitive. hpo is used more often than yan, sometimes hpo and yan are used together [L §310 (6)] and are occasionally corrupted to hpo-ya

The verbal noun is often used instead of an infinitive of purpose* yā-htā: a-hkaw-hkaing-laik-san:-bā please send for a carriage.

Interrogation.

la: is used in questions to which the answer is simply 'yes' or 'no.'

le: is used in questions to which the answer is not simply 'yes' or 'no' (i.e. in all sentences in which be is used) ton: is often used instead of le:

naw [J. §119. L. §340 (3)] This affix is not strictly speaking interrogative. It is an exclamation soliciting acquiescence and is used chiefly in connection with taw thus thwa:-daw-naw you will go now, wont you?

Negation.

L. §349. mā is often followed by hpū: which is used instead of the suppressed temporal particles thī, pyī or myi thus thū mā-thwā:-bū: may therefore mean, he does

Note.—Lonsdale §307 states that these verbal nouns are used adverbially. Stevenson (D. p. 1) calls a an infinite prefix used in the colloquial language.

not go, he did not go, he will not go. It is, however, more polite to use pa than hpu:

ma hnin in the imperative becomes ma ne

Verbal Affixes.

The polite affix pa sometimes becomes pa The affix has is replaced by lu (J. §115).

no:-no: which implies probability is corrupted to lo-lo, mo:-yua-me-lo-lo htin-de he thinks it will probably rain.

pe: 'to give' is often used as an auxiliary verb of causation instead of using kyun-nok-to or kyun-nok-a-twet thus pyaw-pe:-ba please speak (for me). we-pe:-ba please buy (for me).

Emphatic Affixes.

tā-gā: is corrupted to kā-lā: tè-maik-pā-gā-lā: he is indeed foolish. (Stevenson's Dictionary, page 482).

(J. §121). yo:-la: is affixed to the root and forms a strong negative taw-yo:-la: it is not proper.

mā-kā (to exceed) shortened to ka is often used with yo:, a-thet-ngā:-zē ka-yo:-lā:|| ka-myī mā-htin-bā (he) is certainly not more than 50. (1) do not think (he) is more.

hla 'very' is often followed by chi or ka-la: nahia-gyi-ga-la: he suffered much indeed.

paw 'of course' [L. §358 (10)] is used at the end of a sentence with persistive force, it is often used with thā: and means 'certainly' 'without doubt' thi-dā-paw of course there is. a-thi-thā:-paw I certainly know. (Stevenson's Dictionary, page 712).

⁽J. §119). kaw or kaw-le is used in the same sense as paw

8 ALDTERNZ

[]. §119. L. §358 (9).] le or lā:-le slightly emphatic and persistive is used after the assertive affixes. shi-thī-lā:-le it is certainly or I assure you.

Conjunctions.

yaw yaw 'both and' is used instead of li:
..... li: both to connect nouns and sentences lu-yaw myin:
yaw both men and horses.

taw or taw-ga 'when' is used instead of thaw-a-hkā a-chein-kya-daw-ga sā-pyan-laik-me (1) shall reply (lit. when the time falls) in due course.

taw 'when' preceded by a verb with the perfect affix pyi or bi is often used instead of yue, pyaw:-pi-daw htwet-thwa:-de (I) spoke and went away tha-pi-daw kaung:-de (it) is much better.

lo is also used instead of yue to form a present or past participle or as meaning 'because' me-dat-lo ma-lok-pa (l) did not do (it) because (l) am forgetful.

mo (Stev. p. 854) frequently preceded by 10 and sometimes by tho is also used instead of thaw-gyaung thus seik-hso:-lo-mo pyaw-thī mā-hok-pā || myit-tā-shi-lo-thā pyaw-bā-thī (1) do not say (so) be cause (1) am angry, (1) say (so) only because I am friendly.

lo is used instead of kc-tho (L. §385). ngā-mo:-thā-lo me:||ngā-pyaw:-thā-lo pyaw: ask as I ask, speak as I speak.

yin is the softening down of hiyin 'if' or 'when' she-zun-la-kya-yin a-thet hna-hse pye-me (I) shall be twenty next June (L. p. 276 gives this word as yin:)

hlyin in hlyin chin: is often suppressed and yauk-hlyin yauk-chin: becomes yauk-yauk-chin: 'as soon as (he) arrived.'

ton: (L. p. 276) is used instead of sin 'while' thay yet-thi: hlaing-don: thu-yauk-to he arrived while mangoes were abundant.

about of the properties of

hpyin (Stevenson, p. 763) a corruption of hpyit-hlyin thu-go-two-da-hpyin na-na-gyi: hso:-laik-me if (I) meet him (I) will speak severely (to him).

Adverbs.

to or im-ma-tan is used instead of a-lun 'exceedingly.'

net-hpyin-gā instead of net-hpan-ga 'to-morrow.'
gā-ne instead of thī-gā-ne 'to-day.'
nauk-tā-hkā instead of tā-hpan 'again.'
a-hkauk instead of a-hkā 'time 'tā-hkauk 'once.
mā-k²(to exceed) is frequently shortened to ka
yā-hku is abbreviated to gu
pin is written bê: in the same way as hnin is written

Prepositions.

hne or ne 'with' is written instead of hnin lo is used instead of ke-tho 'like.'
hsī is used instead of htan 'presence.'

Noun clauses.

tā or htā (or dā when preceded by a vowel or nasal is used as a nominative or accusative affix with noun clauses. It is probably a contraction of thī and hā a corruption of hmā thus 'what he says is not right.'

thủ hso-thĩ-hmã mã-thin becomes in colloquial thủ hso-thĩ-hã mã-thin thủ hso-da mã-thin

Words spoken.

Words spoken are followed by:

- (a) lo which is the equivalent of the literary hu. It is used in quoting one's own words or those of another person with verbs of thinking or speaking net-hpan thwā:-myi-lo pyaw:-laik-thī(l) said that (l) would start to-morrow. myin-go pyin-laik-pā-lo myin-dein-go pyaw:-laik tell the syce to get (my) pony ready.
- (b) te (or de) (L. §387 (4) J. §119) which is used in repeating the words of one person to a third person and the verb of speaking is generally omitted. rā-me bā-le:-de ma:-de he asks what is your name.

The student will notice that the difference between the use of 10 and to is:

lo is used in quoting one's own words or those of another.

te cannot be used to quote one's own words.

lo requires the use of a verb of saying or thinking.

to generally requires no verb of speaking or thinking.

In using lo two persons only are in question; in using to three persons are in question and are generally present together.

Note—According to Stevenson D. p. 888 con hta or all da is a colloquial corruption of hma thus hkim-bya:-ngwe-pe:-da (pe:-thi-hma) be-lauk-kya-byi:-le: how long is it since you gave the money? hkim-bya:-yauk-ta (yauk-thi-hma) be-hna-yet shi-byi:-le: how many days is it since you arrived?

Some of the most common colloquial forms are given below in Burmese alphabetical order.

lm-mā-fan အပ်မတ \S a-pon-gyi : အပုံကြီး = အတ္ဆ \S ။ a-hlun, exceedingly.

a-wet ങാൻ = യന്റാന് ta-wet half.

ā :-lon : အား ထုံး = အထုံး a-lon : all.

ā:-gyī: ഓாடு: exceedingly.

ka m = um in excess, beyond.

kā-ya $\infty q = \infty g$ thā-hmya thus twe-gā-ya pyaw:-thī (he) says whatever comes into his head.

ka-yo: ကရိုး = strong negative.

kā-lā: നയാ = നയാ: tā-gā: indeed.

 $\mathbf{k}\hat{\mathbf{e}} \hat{\mathbf{e}} \Rightarrow \mathbf{e} \hat{\mathbf{e}}$ present or past tense affix $\mathbf{h} \mathbf{e} \cdot \mathbf{e} \cdot \hat{\mathbf{a}}$: is it so?

kaw coop interrogative what about?

kaw cmp = of course.

kyok $m_1\delta = m_1 \S \delta I$.

hkat $\circ \delta =$ somewhat.

hkā-daing: ာါထိုင်း = တိုင်း taing: every a'တိုင်းနှစ် (every time year) every year shortened to hnit-taing: နှစ်တိုင်း

hkauk-taing : ခေါက်တို**်း** = အခါထိုင်း every time တ ခေါက် **tă-hk**auk Once. hku ବ = ଓ୍ଦ୍ର ya-hku now.

chin: ସ୍ୱାଧି = ସେସ୍ୱାଧିୟା a-chin:-gyin: each other. chin: is generally attached to a noun lu-gyln: yan-hpyit-kya-de the men quarrelled together.

chin : ခြင်း = တျှင် ... ခြင်း hiyin chin : as soon as.

gu $\rho = \infty \gamma$ yā-hku now.

so 8 = verb with 3 an let us.

ta-ta oo denotes colour an adjective of quality.

tā-hseik or tā-hseik tā-bauk ගනිනිතාටෙන් (from නිනි hseik to pinch), a pinch, a small quantity, a little.

ta-cho con = con a-cho some.

tā-chā: හැබුා: = නාඛා: a-chā: other.

te တယ် = သည် thi (tense affix).

te ဘယ်=အလွန်။ a-hlun thus te-pī: mā-lok-chin-bū: I do not much wish to do (it).

ton: $\infty = \infty$ lè:

ton: ထုံး = စည် sin while.

te හි. = හො thaw or නතු thi (relative pronoun).

taw cop = cop law (imperative affix).

taw-ga conon = consol thaw-a-hka when.

do တို့ = ကျွန်ုပ်ထို kyun-nok-to we.

taung ගොරි = න්රිකොරි taing-aung even.

da 3 = w tha

da 3 = ops thi this; da-lo thus.

de ဒယ် = သည် thi (tense affix).

da $\vec{a} = သည်အာရ thi-a-ya$ this thing, this.

 $d\bar{i} \hat{3} = \infty p \int_{0}^{\infty} th\bar{i}$ this.

dī-gā-ne ဒီဂနေ့ = သည်ကနေ့ thī-gā-ne to-day.

dī-hā ဒီတာ = သည်အော့ thī-a-ya this thing, this.

de 3. = aps thi (relative pronoun).

de 3 = 07 hu (indicates words spoken p. 139).

net-hpyin-ga နထ်ဖြင့်ကာ = နထ်ဖြန်ခါ net-hpyan-ga tomorrow (literary form.)

nā-mè နာခည် = အမည် a-myi name. ne နှ. = နှင့် hnin with.

ne:-ne: နဲနဲ = နည်းနည်း ni:-ni: few, little.

nauk-ta-hka ຊາກວິດວາ = ດວະ ta-hpan (once after) again.

Francisco Commercia

naw cas = wont you?

no \S = ∞ tho thus.

no-be-de နို.ပေဒယ်. = သို့ပေသည် (it is even thus) otherwise.

no-mā-hok \S .မဟုတ် = ထိုမဟုတ်လျှင် (if it is not so) otherwise.

no-mo-yin နိုမို ရင် = သို့ခတ္တတ်လျှင် (if it is not so) otherwise.

pa o = ol pa (polite affix).

pā o before interrogatives) 8 8 or 8 pyī:-byī or pyī
pī 8 at end of sentences (in have) or pluperfect).

pe : Go: used with another verb to express 'for me, etc.

pī-bī ဗီဗီ = အာဂျင်း a-hlyin ; not at all.

pi :-daw ပီး ဘော့ = ၍ yua

pyī-byī 88 see pī-bī (see Stev. pp. 693 and 731).

pyī :-daw ပြီးတော့ see pī :-daw

paw co] = of course.

hpyln $G = G \delta M \delta M \delta$ hpylt-hlyin if it is so (Stev. p. 763).

ba-du ons who? (for all compounds of be see p. 131).

bā-mā පෘට = ලිදු myā-ma Burmese.

bu: on used with o ma in negative sentences.

be: ဘဲ = ບຣິກ pin even, da-lo-be: even so, exactly so.

hpo-yā သို့ရာ = ရ\$ yan (infinitive or verbal noun

hpo-yan ရှိရန်

mā ω before interrogatives = ωδ myī (future tense mê ωδ at end of sentences) affix).

hma 9 = 9 hmya even.

mã o = 90 hmã in.

mā-ne: wa (lit. not little) = \(\infty \) a-hlun exceedingly mā-ne: kyī:-de (it) is very big.

 $m\tilde{a}.....b\tilde{u}$; ω , ω = ωp \tilde{a} (negation with indicative).

mo ခို. = သေးတြောင့် thaw-gyaung

myā:-do များသို့ = များ or ထို myā: or to (plural of nouns).

ye q. = fi i (present or past tense affix).

yaw cop (repeated) = qδ: (repeated) both...and.

yo:-la ရိုးလား = strong negative.

yin $9\hat{c} = \infty \delta$ hlyin when or if.

la :-le cossco emphatic.

le: ထဲ = ထည်း li : also.

lu oq = à hse : about to.

lo ထို သောကြောင့် or ၍ thaw-gyaung or yue because.

lo of = mag ke-tho as, like as.

10 of euphonic affix used with the future tense.

10-10 a = \$13: no:-no: probably.

hla-gā-lā: လူကသား) intensive.

hivet ගැන් = ගැනි ivet (forms present participle).

ရှိလျက်သား နှင့်မပေးဘူး **shi-lyet-thā:-hnin mā-pe:-bū** although he has some, he will not give any.

hle တွဲ. = လှည့် hli (indicates motion towards speaker)

hā ഗാ = ജ്വൈ a-yā thing.

ho $\mathcal{A} = \mathcal{A}$ hto that.

 $\left. \begin{array}{ll} \text{ho-thin}: \left. \partial_{i}^{2} \otimes \delta_{i} \right. \\ \text{ho-din}: \left. \partial_{i}^{2} \delta_{i} \right. \end{array} \right\} = \partial_{i}^{2} \text{ hto that}.$
